The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars. **Intermediate Accounting** Dec 30 2019 With a distinctly Canadian agenda, Beechy/Conrod/Farrell/McLeod-Dick Intermediate Accounting, Volumes 1&2, develops both the technical skills and the professional judgement needed for students to succeed in this course. Accounting and Debt Markets Mar 01 2020 Accounting and Debt Markets: Four Pieces on the Role of Accounting Information in Debt Markets provides novel and up-to-date evidence on the role of accounting information in debt markets Companies and organisations worldwide rely heavily on debt markets for short, medium and long-term financing, and debt markets and financial intermediaries have significant effects on the real economy. Accounting information has various functions in debt markets, including inter alia, informing pricing decisions and credit ratings, determining the allocation of creditor control rights and establishing bank capital adequacy requirements. The chapters in this book provide illustrative discussion, analysis and evidence on the importance of accounting information in credit markets. The first of the four pieces reflects on how a conservative financial reporting system helps firms obtain debt funds and with better conditions, and why this is the case. The second examines the effects of accounting disclosure on credit ratings of private companies and shows that accounting information is useful for credit rating agencies. The two final pieces reflect on how banks should account for credit losses, and on how regulators are tackling this issue. The chapters in this book were originally published as a special issue of Accounting and Business Research.

New Zealand and Europe Nov 28 2019 This book is one of first comparative studies of the cultural, political and economic interactions between New Zealand and Europe. The chapters that comprise this book are a deliberate exercise in variety inside the theme of New Zealand and Europe: Connections and Comparisons. They derive from the first conference of the New Zealand European Studies Association and give a flavour of the active and far-reaching nature of studies relating to Europe currently taking place in New Zealand. The cultural and historical chapters, while often quite specific in focus, touch on themes of universal cross-cultural relevance: the fate of imported languages and cultures; the tendencies to familiarise or exoticise unknown lands; the problematic representation of women in politics; the ambivalences and tensions between dominant and subordinate cultures; and the responsibility of the intellectual in the face of authority.
