Quantitative Anthropology Dec 30 2019 *Quantitative Anthropology: A Workbook* contributes an anthropological perspective to quantitative methods. The book's authors address characteristics of quantitative data, entering and manipulating data in SPSS, graphical displays, distributions and measures of central tendency and dispersion, and including hypothesis testing with both parametric and nonparametric statistical tests. Increasingly complex exercises build on cumulative learning from chapter to chapter and stress the application of methods beyond coursework. The focus of the manual is on univariate statistical analysis, and the book is written to be accessible to higher level undergraduate students and graduate students in all fields of anthropology. Uses anthropological examples (from the subdisciplines of sociocultural anthropology, biological anthropology, and archaeology) to illustrate quantitative data techniques Integrates quantitative techniques with theoretical fluency, encouraging the reader to make connections between Big Picture questions in anthropology and the methods used to address those questions Focuses on the practical use of Excel and SPSS to apply quantitative methods to anthropological contexts Includes exercises in both parametric and nonparametric inferential statistics, as well as descriptive statistics

Cultural Anthropology Jul 25 2019 What is cultural anthropology, and how is it relevant in today's world? Robert L. Welsch and Luis A. Vivanco's *Cultural Anthropology: Asking*

Questions About Humanity uses a questions-based approach to teach students how to think anthropologically, helping them view cultural issues and everyday experiences as an anthropologist might. Inspired by the common observation that 99 percent of a good answer is a good question, *Cultural Anthropology: Asking Questions About Humanity* combines a question-centered pedagogy with the topics typically covered in an introductory course. It emphasizes up front what the discipline of anthropology knows and which issues are in debate, and how a cultural perspective is relevant to understanding social, political, and economic dynamics in the contemporary world. *Cultural Anthropology: Asking Questions About Humanity* also represents an effort to close the gap between the realities of the discipline today and traditional views that are taught at the introductory level by bringing classic anthropological examples, cases, and analyses to bear on contemporary questions.

Cultural Anthropology Jun 15 2021 Covering the essential concepts that drive cultural anthropology today, Ken Guest's *Cultural Anthropology: A Toolkit for a Global Age* shows students that now, more than ever, global forces affect local culture and that the tools of cultural anthropology are essential to living in a global society. A "toolkit" approach encourages students to pay attention to big questions raised by anthropologists, offers study tools to remind readers what concepts are important, and shows them why it all matters in the real world.

Perspectives Jan 11 2021 "This textbook is a collection of chapters on the essential topics in

cultural anthropology. Different from other introductory textbooks, this book is an edited volume with each chapter written by a different author. Each author has written from their experiences working as an anthropologist and that personal touch makes for an accessible introduction to cultural anthropology. The authors' approach to cultural anthropology is holistic. They see the interconnectedness of cultural practices and, in all of the chapters, they emphasize the comparison of cultures and the ways of life of different peoples."-- BCcampus website.

3D Data Acquisition for Bioarchaeology, Forensic Anthropology, and Archaeology Aug 25 2019 3D Data Acquisition for Bioarchaeology, Forensic Anthropology, and Archaeology serves as a handbook for the collection and processing of 3-D scanned data and as a tool for scholars interested in pursuing research projects with 3-D models. The book's chapters enhance the reader's understanding of the technology by covering virtual model processing protocols, alignment methods, actual data acquisition techniques, basic technological protocols, and considerations of variation in research design associated with biological anthropology and archaeology. Thoroughly guides the reader through the "how-to on different stages of 3D-data-related research Provides statistical analysis options for 3D image data Covers protocols, methods and techniques as associated with biological anthropology and archaeology

The Art of Anthropology Dec 22 2021 The Art of Anthropology collects together the most

influential of Gell's writings, which span the past two decades, with a new introductory chapter written by Gell. The essays vividly demonstrate Gell's theoretical and empirical interests and his distinctive contribution to several key areas of current anthropological enquiry. A central theme of the essays is Gell's highly original exploration of diagrammatic imagery as the site where social relations and cognitive processes converge and crystallise. Gell tracks this imagery across studies of tribal market transactions, dance forms, the iconicity of language and his most recent and groundbreaking analyses of artworks. Written with Gell's characteristic fluidity and grace and generously illustrated with Gell's original drawings and diagrams, the book will interest art historians, sociologists and geographers no less than anthropologists, challenging, as it does, established ideas about exchange, representation, aesthetics, cognition and spatial and temporal processes.

Routledge Handbook of Environmental Anthropology Feb 09 2021 Environmental Anthropology studies historic and present human-environment interactions. This volume illustrates the ways in which today's environmental anthropologists are constructing new paradigms for understanding the multiplicity of players, pressures, and ecologies in every environment, and the value of cultural knowledge of landscapes. This Handbook provides a comprehensive survey of contemporary topics in environmental anthropology and thorough discussions on the current state and prospective future of the field in seven key sections. As the contributions to this Handbook demonstrate, the subfield of environmental anthropology

is responding to cultural adaptations and responses to environmental changes in multiple and complex ways. As a discipline concerned primarily with human-environment interaction, environmental anthropologists recognize that we are now working within a pressure cooker of rapid environmental damage that is forcing behavioural and often cultural changes around the world. As we see in the breadth of topics presented in this volume, these environmental challenges have inspired renewed foci on traditional topics such as food procurement, ethnobiology, and spiritual ecology; and a broad new range of subjects, such as resilience, nonhuman rights, architectural anthropology, industrialism, and education. This volume enables scholars and students quick access to both established and trending environmental anthropological explorations into theory, methodology and practice.

Introducing Urban Anthropology May 03 2020 This book provides an up-to-date introduction to the important and growing field of urban anthropology. This is an increasingly critical area of study, as more than half of the world's population now lives in cities and anthropological research is increasingly done in an urban context. Exploring contemporary anthropological approaches to the urban, the authors consider: How can we define urban anthropology? What are the main themes of twenty-first century urban anthropological research? What are the possible future directions in the field? The chapters cover topics such as urban mobilities, place-making and public space, production and consumption, politics and governance. These are illustrated by lively case studies drawn

from a diverse range of urban settings in the global North and South. Accessible yet theoretically incisive, *Introducing Urban Anthropology* will be a valuable resource for anthropology students as well as of interest to those working in urban studies and related disciplines such as sociology and geography.

Museums and Anthropology in the Age of Engagement Jan 23 2022 *Museums and Anthropology in the Age of Engagement* considers changes that have been taking place in museum anthropology as it has been responding to pressures to be more socially relevant, useful, and accountable to diverse communities. Based on the author's own research and applied work over the past 30 years, the book gives examples of the wide-ranging work being carried out today in museum anthropology as both an academic, scholarly field and variety of applied, public anthropology. While it examines major trends that characterize our current "age of engagement," the book also critically examines the public role of museums and anthropology in colonial and postcolonial contexts, namely in the US, the Netherlands, and Indonesia. Throughout the book, Kreps questions what purposes and interests museums and anthropology serve in these different times and places. *Museums and Anthropology in the Age of Engagement* is a valuable resource for readers interested in an historical and comparative study of museums and anthropology, and the forms engagement has taken. It should be especially useful to students and instructors looking for a text that provides in one volume a history of museum anthropology and methods for doing critical,

reflexive museum ethnography and collaborative work.

Handbook of Methods in Cultural Anthropology Aug 18 2021 The Handbook of Methods in Cultural Anthropology, now in its second edition, maintains a strong benchmark for understanding the scope of contemporary anthropological field methods. Avoiding divisive debates over science and humanism, the contributors draw upon both traditions to explore fieldwork in practice. The second edition also reflects major developments of the past decade, including: the rising prominence of mixed methods, the emergence of new technologies, and evolving views on ethnographic writing. Spanning the chain of research, from designing a project through methods of data collection and interpretive analysis, the Handbook features new chapters on ethnography of online communities, social survey research, and network and geospatial analysis. Considered discussion of ethics, epistemology, and the presentation of research results to diverse audiences round out the volume. The result is an essential guide for all scholars, professionals, and advanced students who employ fieldwork.

Why the World Needs Anthropologists Nov 20 2021 Why does the world need anthropology and anthropologists? This collection of essays written by prominent academic, practising and applied anthropologists aims to answer this provocative question. In an accessible and appealing style, each author in this volume inquires about the social value and practical application of the discipline of anthropology. Contributors note that the

problems the world faces at a global scale are both new and old, unique and universal, and that solving them requires the use of long-proven tools as well as innovative approaches. They highlight that using anthropology in relevant ways outside academia contributes to the development of a new paradigm in anthropology, one where the ability to collaborate across disciplinary and professional boundaries becomes both central and legitimate. Contributors provide specific suggestions to anthropologists and the public at large on practical ways to use anthropology to change the world for the better. This one-of-a-kind volume will be of interest to fledgling and established anthropologists, social scientists and the general public.

The Routledge Companion to Contemporary Anthropology Mar 01 2020 The Routledge Companion to Contemporary Anthropology is an invaluable guide and major reference source for students and scholars alike, introducing its readers to key contemporary perspectives and approaches within the field. Written by an experienced international team of contributors, with an interdisciplinary range of essays, this collection provides a powerful overview of the transformations currently affecting anthropology. The volume both addresses the concerns of the discipline and comments on its construction through texts, classroom interactions, engagements with various publics, and changing relations with other academic subjects. Persuasively demonstrating that a number of key contemporary issues can be usefully analyzed through an anthropological lens, the contributors cover important topics such as globalization, law and politics, collaborative archaeology, economics,

religion, citizenship and community, health, and the environment. The Routledge Companion to Contemporary Anthropology is a fascinating examination of this lively and constantly evolving discipline.

Anthropology and Modern Life Jun 03 2020 The great anthropologist's classic treatise on race and culture. One of the most influential books of the century, now available in a value-priced edition. Introduction by Ruth Bunzel.

Horizons of Anthropology Nov 01 2022 The scientific study of human evolution and culture is about a hundred years old. This volume surveys its achievements and methods. Originally published more than forty years ago, the volume's contributors include people who have shaped anthropology's future. As Gluckman says in his Preface, the contributions "point to the horizons of increasing understanding of man, his evolution and his social setting, as seen by a rising generation of scholars." The book includes chapters on how man gradually became different from other primates--on the origin and nature of language and its contribution to our peculiarities as human beings. It surveys the long history of human culture and societies and the theories about their similarities and differences; it discusses human equality and inequality, and it considers, from the anthropologist's point of view, economics, politics, law, religion, medicine, and the arts. In recent decades the various branches of anthropology--physical, cultural, psychological, and social--have become more specialized, and each branch is increasingly linking itself to its appropriate cognate,

biological, psychological, or social sciences. Yet there remains a central common field to anthropology, as the science of man, for practitioners in all its branches. This book develops that common interest and deals with the specific problems of various parts of the field. The book brings out the basic nature of anthropology and the extraordinary fascination that lies in the systematic study of the exuberant variety of human societies and customs. Sol Tax (1907-1995) was Professor Emeritus of Anthropology at the University of Chicago. He was widely known as the founder of the journal *Current Anthropology* and for his work with Native Americans, particularly the Fox and Sauk Indians. Max Gluckman (1911-1975) was head of the department of social anthropology and sociology at the University of Manchester. He is well known for his many books and articles on the peoples of South and Central Africa and on social anthropology in general.

Contemporary Art and Anthropology Apr 01 2020 This work challenges the reluctance that exists within anthropology to pursue alternative strategies of research, creation and exhibition, and argues that contemporary artists and anthropologists have much to learn from each other's practices.

The Routledge Handbook of Medical Anthropology Mar 25 2022 The Routledge Handbook of Medical Anthropology provides a contemporary overview of the key themes in medical anthropology. In this exciting departure from conventional handbooks, compendia and encyclopedias, the three editors have written the core chapters of the

volume, and in so doing, invite the reader to reflect on the ethnographic richness and theoretical contributions of research on the clinic and the field, bioscience and medical research, infectious and non-communicable diseases, biomedicine, complementary and alternative modalities, structural violence and vulnerability, gender and ageing, reproduction and sexuality. As a way of illustrating the themes, a rich variety of case studies are included, presented by over 60 authors from around the world, reflecting the diverse cultural contexts in which people experience health, illness, and healing. Each chapter and its case studies are introduced by a photograph, reflecting medical and visual anthropological responses to inequality and vulnerability. An indispensable reference in this fastest growing area of anthropological study, *The Routledge Handbook of Medical Anthropology* is a unique and innovative contribution to the field.

The Best of Anthropology Today Jul 05 2020 The articles in this influential journal placed it in the thick of a turbulent period for anthropology. Reacting to current research interests and launching what were often heated debates, it set the agenda for disciplinary change and new research. Once described the American Anthropological Association as creating 'a strong voice for anthropology in the public arena', the Founder Editor, Jonathan Benthall, introduces here a personal selection of articles and letters with his own candid retrospect, arguing that the discipline's greatest strength and potential lies in testing and refining the ideas of other disciplines. Once described by the American Anthropological Association as

Architecture and Anthropology Oct 08 2020 Both architecture and anthropology emerged as autonomous theoretical disciplines in the 18th-century enlightenment. Throughout the 19th century, the fields shared a common icon—the primitive hut—and a common concern with both routine needs and ceremonial behaviours. Both could lay strong claims to a special knowledge of the everyday. And yet, in the 20th century, notwithstanding genre classics such as Bernard Rudofsky's *Architecture without Architects* or Paul Oliver's *Shelter*, and various attempts to make architecture anthropocentric (such as Corbusier's *Modulor*), disciplinary exchanges between architecture and anthropology were often disappointingly slight. This book attempts to locate the various points of departure that might be taken in a contemporary discussion between architecture and anthropology. The results are radical: post-colonial theory is here counterpoised to 19th-century theories of primitivism, archaeology is set against dentistry, fieldwork is juxtaposed against indigenous critique, and climate science is applied to questions of shelter. This publication will be of interest to both architects and anthropologists. The chapters in this book were originally published within two special issues of *Architectural Theory Review*.

A Companion to Medical Anthropology Jun 23 2019 *A Companion to Medical Anthropology* examines the current issues, controversies, and state of the field in medical anthropology today. Provides an expert view of the major topics and themes to concern the discipline since its founding in the 1960s Written by leading international scholars in medical anthropology Covers environmental health, global health, biotechnology, syndemics, nutrition, substance abuse, infectious disease, and sexuality and reproductive health, and other topics

Anthropology, by Comparison Apr 25 2022 Comparison has long been the backbone of the discipline of anthropology. But recent developments in anthropology, including critical self-reflection and new case studies sited in a globalized world, have pushed comparative work aside. For the most part, comparison as theory and method has been a casualty of the critique of 'grand theory' and of a growing mistrust of objectivist, hard-science methodology in the social sciences. Today it is time for anthropology to resume its central task of exploring humankind through comparison, using its newfound critical self-awareness under changing global conditions. In *Anthropology By Comparison*, an international group of prominent anthropologists re-visits, re-theorizes and re-invigorates comparison as a legitimate and fruitful enterprise. The authors explore the value of anthropological comparison and encourage an international dialogue about comparative research. While rejecting older, universalist comparative methods, these scholars take a fresh look at various

subaltern and neglected approaches to comparison from their own national traditions. They then present new approaches that are especially relevant to the globalized world of the twenty-first century. Every student and practitioner of anthropology and the social sciences will find this thought-provoking volume essential reading. Anthropology, by Comparison is a call to creative reflection on the past and productive action in the present, a challenge to anthropologists to revitalize their unique contribution to human understanding.

Anthropology, by Comparison is an indispensable overview of anthropology's roots - and its future - with regard to the comparative study of humankind.

Introduction to Evolutionary Anthropology Feb 21 2022 *Introduction to Evolutionary Anthropology* represents a new, exciting perspective on the field of evolutionary anthropology. This text explores evolutionary anthropology in a unique and lively manner. This text is student-friendly, low-tech, and affordable, and has an entertaining and narrative style that is clearly written, comprehensive, and engaging. The book features an unconventional writing style with fun examples and humorous cartoons throughout the text.

Cultural Anthropology Aug 30 2022 **CULTURAL ANTHROPOLOGY: AN APPLIED PERSPECTIVE**, Canadian Edition, goes beyond providing a comprehensive overview of the discipline and fully integrates the application of the theories, insights, and methods of cultural anthropology to contemporary situations. The authors recognize that cultures-Canadian and abroad-are in a constant state of flux and are continually interacting with each

other both locally and globally. To capture this dynamic and to enhance student learning and illustrate the relevance of cultural anthropology in our everyday lives, current topics include the growth of information technologies, innovations such as multi-sited field research, reflexive and intersubjective approaches, human relations with the environment, religious and political conflict, medical anthropology, climate change, international migration, urbanization, development, and business anthropology. Student engagement is reinforced with strong pedagogical features and themes that encourage readers to reflect and think critically about issues like community and social responsibility, economics, and the environment. MindTap, a fully online learning solution, combines all learning tools-readings, multimedia, activities, and assessments-into a single Learning Path that guides the student through the curriculum and brings anthropology to life!

The Handbook of Sociocultural Anthropology Jul 29 2022 he Handbook of Sociocultural Anthropology presents a state of the art overview of the subject - its methodologies, current debates, history and future. It will provide the ultimate source of authoritative, critical descriptions of all the key aspects of the discipline as well as a consideration of the general state of the discipline at a time when there is notable uncertainty about its foundations, composition and direction. Divided into five core sections, the Handbook: examines the changing theoretical and analytical orientations that have led to new ways of carrying out research; presents an analysis of the traditional historical core and how the discipline has

changed since 1980; considers the ethnographic regions where work has had the greatest impact on anthropology as a whole; outlines the people and institutions that are the context in which the discipline operates, covering topics from research funding to professional ethics. Bringing together leading international scholars, the Handbook provides a guide to the latest research in social and cultural anthropology. Presenting a systematic overview - and offering a wide range of examples, insights and analysis - it will be an invaluable resource for researchers and students in anthropology as well as cultural and social geography, cultural studies and sociology.

Art, Anthropology and the Gift Sep 26 2019 In recent decades, the dialogue between art and anthropology has been both intense and controversial. *Art, Anthropology and the Gift* provides a much-needed and comprehensive overview of this dialogue, whilst also exploring the reciprocal nature of the two subjects through practice, theory and politics. Fully engaging with anthropology and art theory, this book innovatively argues that art and anthropology don't just share methodologies, but also deeper intellectual, theoretical and even political concerns, inviting scholars and students alike to look at this contentious relationship in a more critical light. One of the central arguments of the book is that the problem of the 'gift' has been central to both anthropological and artistic practice. This very idea connects the different chapters on topics including aesthetics, politics, participation and fieldwork.

Asian Anthropology Sep 30 2022 Asian Anthropology raises important questions regarding the nature of anthropology and particularly the production and consumption of anthropological knowledge in Asia. Instead of assuming a universal standard or trajectory for the development of anthropology in Asia, the contributors to this volume begin with the appropriate premise that anthropologies in different Asian countries have developed and continue to develop according to their own internal dynamics. With chapters written by an international group of experts in the field, Asian Anthropology will be a useful teaching tool and a valuable resource for scholars working in Asian anthropology.

The Routledge Handbook of Anthropology and Reproduction Aug 06 2020 The Routledge Handbook of Anthropology and Reproduction is a comprehensive overview of the topics, approaches, and trajectories in the anthropological study of human reproduction. The book brings together work from across the discipline of anthropology, with contributions by established and emerging scholars in archaeological, biological, linguistic, and sociocultural anthropology. Across these areas of research, consideration is given to the contexts, conditions, and contingencies that mark and shape the experiences of reproduction as always gendered, classed, and racialized. Over 39 chapters, a diverse range of international scholars cover topics including: Reproductive governance, stratification, justice, and freedom. Fertility and infertility. Technologies and imaginations. Queering reproduction. Pregnancy, childbirth, and reproductive loss. Postpartum and infant care. Care, kinship, and

alloparenting. This is a valuable reference for scholars and upper-level students in anthropology and related disciplines associated with reproduction, including sociology, gender studies, science and technology studies, human development and family studies, global health, public health, medicine, medical humanities, and midwifery and nursing.

Anthropology Sep 06 2020 From the authors who wrote the highly acclaimed *Cultural Anthropology: Asking Question About Humanity*, this ground-breaking general anthropology text--co-written with renowned scholar Agust•n Fuentes--takes a holistic approach that emphasizes critical thinking, active learning, and applying anthropology to solve contemporary human problems. Building on the classical foundations of the discipline, *Anthropology: Asking Questions about Human Origins, Diversity, and Culture* shows students how anthropology is connected to such current topics as food, health and medicine, and the environment. Full of relevant examples and current topics--with a focus on contemporary problems and questions--the book demonstrates the diversity and dynamism of anthropology today.

A Concise Introduction to Cultural Anthropology May 27 2022 This book offers a concise and accessible overview of cultural anthropology for those coming to the subject for the first time. It introduces key areas of the discipline and touches on its historical developments and applied aspects. As well as traditional topics such as social organization, politics, and economics, the book engages with important contemporary issues including

race, gender, sexuality, and colonialism. In a beginner-friendly format, this book is ideal for students of anthropology, as well as for the interested reader as an introduction to the subject.

Introducing Anthropology Mar 13 2021 The perfect starting point for any student new to this fascinating subject, offering a serious yet accessible introduction to anthropology. Across a series of fourteen chapters, *Introducing Anthropology* addresses the different fields and approaches within anthropology, covers an extensive range of themes and emphasizes the active role and promise of anthropology in the world today. The new edition foregrounds in particular the need for anthropology in understanding and addressing today's environmental crisis, as well as the exciting developments of digital anthropology. This book has been designed by two authors with a passion for teaching and a commitment to communicating the excitement of anthropology to newcomers. Each chapter includes clear explanations of classic and contemporary anthropological research and connects anthropological theories to real-life issues at the local and global levels. The vibrancy and importance of anthropology is a core focus of the book, with numerous interviews with key anthropologists about their work and the discipline as a whole, and plenty of ethnographic studies to consider and use as inspiration for readers' own personal investigations. A clear glossary, a range of activities and discussion points, and carefully selected further reading and suggested ethnographic films further support and extend students' learning. *Introducing*

Anthropology aims to inspire and enthuse a new generation of anthropologists. It is suitable for a range of different readers, from students studying the subject at school-level to university students looking for a clear and engaging entry point into anthropology.

Savage Money Apr 13 2021 This volume is not simply another general theory of world system. It is a theoretically and ethnographically informed collection of essays which opens up new questions through an examination of concrete cases, covering global and local questions of political economy.

The Routledge Handbook of Anthropology and the City Oct 27 2019 The Routledge Handbook of Anthropology and the City provides a comprehensive study of current and future urban issues on a global and local scale. Premised on an 'engaged' approach to urban anthropology, the volume adopts a thematic approach that covers a wide range of modern urban issues, with a particular focus on those of high public interest. Topics covered include security, displacement, social justice, privatisation, sustainability, and preservation. Offering valuable insight into how anthropologists investigate, make sense of, and then address a variety of urban issues, each chapter covers key theoretical and methodological concerns alongside rich ethnographic case study material. The volume is an essential reference for students and researchers in urban anthropology, as well as of interest for those in related disciplines, such as urban studies, sociology, and geography.

Social and Cultural Anthropology for the 21st Century Jul 17 2021 Social and Cultural

Anthropology for the 21st Century: Connected Worlds is a lively, accessible, and wide-ranging introduction to socio-cultural anthropology for undergraduate students. It draws on a wealth of ethnographic examples to showcase how anthropological fieldwork and analysis can help us understand the contemporary world in all its diversity and complexity. The book is addressed to a twenty-first-century readership of students who are encountering social and cultural anthropology for the first time. It provides an overview of the key debates and methods that have historically defined the discipline and of the approaches and questions that shape it today. In addition to classic research areas such as kinship, exchange, and religion, topics that are pressing concerns for our times are covered, such as climate change, economic crisis, social media, refugees, sexuality, and race. Foregrounding ethnographic stories from all over the world to illustrate global connections and their effects on local lives, the book combines a focus on history with urgent present-day social issues. It will equip students with the analytical tools that they need to negotiate a world characterized by unprecedented cross-cultural contact, ever-changing communicative technologies and new forms of uncertainty. The book is an essential resource for introductory courses in social and cultural anthropology and as a refresher for more advanced students.

Toward an Anthropology of the Will Nov 08 2020 *Toward an Anthropology of the Will* is the first book that systematically explores volition from an ethnographically informed anthropological point of view. While philosophers have for centuries puzzled over the

degree to which individuals are "free" to choose how to act in the world, anthropologists have either assumed that the will is a stable, constant fact of the human condition or simply ignored it. Although they are usually quite comfortable discussing the relationship between culture and cognition or culture and emotion, anthropologists have not yet focused on how culture and volition are interconnected. The contributors to this book draw upon their unique insights and research experience to address fundamental questions, including: What forms does the will take in culture? How is willing experienced? How does it relate to emotion and cognition? What does imagination have to do with willing? What is the connection between morality, virtue, and willing? Exploring such questions, the book moves beyond old debates about "freedom" and "determinacy" to demonstrate how a richly nuanced anthropological approach to the cultural experience of willing can help shape theories of social action in the human sciences.

Anthropology and Nature May 15 2021 On the basis of empirical studies, this book explores nature as an integral part of the social worlds conventionally studied by anthropologists. The book may be read as a form of scholarly "edgework," resisting institutional divisions and conceptual routines in the interest of exploring new modalities of anthropological knowledge making. The present interest in the natural world is partly a response to large-scale natural disasters and global climate change, and to a keen sense that nature matters matters to society at many levels, ranging from the microbiological and

genetic framing of reproduction, over co-species development, to macro-ecological changes of weather and climate. Given that the human footprint is now conspicuous across the entire globe, in the oceans as well as in the atmosphere, it is difficult to claim that nature is what is given and permanent, while people and societies are ephemeral and simply derivative features. This implies that society matters to nature, and some natural scientists look towards the social sciences for an understanding of how people think and how societies work. The book thus opens up a space for new forms of reflection on how natures and societies are generated.

Dental Anthropology Jan 29 2020 Symposia of the Society for the Study of Human Biology, Volume V: Dental Anthropology is a collection of papers that covers the application of dental pathology in the context of anthropology. The book presents 15 studies that cover various human dental variables and relates to different anthropological factors. The dental variables considered in the articles include tooth morphology; occlusion and malocclusion of primate teeth; morphogenesis of deciduous molar pattern in man; and double-rooted human lower canine teeth. The text also covers topics about race specific dental traits such as radiographic study of the Neanderthal teeth from Krapina; crown characters of the deciduous dentition of the Japanese-American hybrids; and analysis of the American Indian dentition. The selection will be of great interest to evolutionary scientists, such as anthropologists and paleontologists.

The Handbook of Sociocultural Anthropology Oct 20 2021 The Handbook of Sociocultural Anthropology presents a state of the art overview of the subject - its methodologies, current debates, history and future. It will provide the ultimate source of authoritative, critical descriptions of all the key aspects of the discipline as well as a consideration of the general state of the discipline at a time when there is notable uncertainty about its foundations, composition and direction. Divided into five core sections, the Handbook: examines the changing theoretical and analytical orientations that have led to new ways of carrying out research; presents an analysis of the traditional historical core and how the discipline has changed since 1980; considers the ethnographic regions where work has had the greatest impact on anthropology as a whole; outlines the people and institutions that are the context in which the discipline operates, covering topics from research funding to professional ethics. Presenting a systematic overview - and offering a wide range of examples, insights and analysis - it will be an invaluable resource for researchers and students in anthropology as well as cultural and social geography, cultural studies and sociology.

Forensic Anthropology Nov 28 2019 Forensic Anthropology: Current Methods and Practice—winner of a 2015 Textbook Excellence Award (Texty) from The Text and Academic Authors Association—approaches forensic anthropology through an innovative

style using current practices and real case studies drawn from the varied experiences, backgrounds, and practices of working forensic anthropologists. This text guides the reader through all aspects of human remains recovery and forensic anthropological analysis, presenting principles at a level that is appropriate for those new to the field, while at the same time incorporating evolutionary, biomechanical, and other theoretical foundations for the features and phenomena encountered in forensic anthropological casework. Attention is focused primarily on the most recent and scientifically valid applications commonly employed by working forensic anthropologists. Readers will therefore learn about innovative techniques in the discipline, and aspiring practitioners will be prepared by understanding the necessary background needed to work in the field today. Instructors and students will find *Forensic Anthropology: Current Methods and Practice* comprehensive, practical, and relevant to the modern discipline of forensic anthropology. Winner of a 2015 Most Promising New Textbook Award from the Text and Academic Authors Association Focuses on modern methods, recent advances in research and technology, and current challenges in the science of forensic anthropology Addresses issues of international relevance such as the role of forensic anthropology in mass disaster response and human rights investigations Includes chapter summaries, topic-oriented case studies, keywords, and reflective questions to increase active student learning

The Foundations of Social Anthropology Jun 27 2022

Psychotherapy, Anthropology and the Work of Culture Sep 18 2021 Anthropology and psychotherapy have a long and important historical relationship, and in this fascinating collection practitioners with experience in both fields explore how the concept of 'culture' is deployed to guide and frame contemporary therapeutic theory, training and practice. This task is particularly important as the global spread of psychotherapy, as both an outgrowth of and a potential point of critique to globalised hyper-capitalism, requires us to think differently about how to conceptualise cultural difference in psychotherapy. *Psychotherapy, Anthropology and the Work of Culture* provides a valuable resource for psychotherapeutic professionals working in a world in which cultural difference appears in fluid and transient moments. It will also provide essential reading for students and researchers working across the fields of psychotherapy and anthropology.

Questions of Anthropology Dec 10 2020 Anthropology today seems to shy away from the big, comparative questions that ordinary people in many societies find compelling. *Questions of Anthropology* brings these issues back to the centre of anthropological concerns. Individual essays explore birth, death and sexuality, puzzles about the relationship between science and religion, questions about the nature of ritual, work, political leadership and genocide, and our personal fears and desires, from the quest to control the future and to find one's 'true' identity to the fear of being alone. Each essay starts with a question posed by individual ethnographic experience and then goes on to frame this question in a broader,

comparative context. Written in an engaging and accessible style, Questions of Anthropology presents an exciting introduction to the purpose and value of Anthropology today.
