Homework, Learning and Academic Success: The Role of Family and Contextual Variables Jun 23 2022 The main purpose of this Research Topic is to analyze and identify the main family and contextual variables that are involved in the process of carrying out homework. This will require studying the role played by teachers, students, and families in order to ensure that schoolwork is a useful learning tool. Although the role of the student is, obviously, crucial in homework, research has focused on the cumulative time spent by the student carrying out homework. However, the time spent on homework is not in itself evidence of the student ' s involvement nor is time spent indicative of quality time. Indeed, an excess of time can sometimes denote low competence in a field of knowledge, while spending less time on homework could be indicative of high competence. It is more likely that a high dedication of time spent on homework reflects high motivation, or comprehension deficits, rather than commitment to learning or academic motivation. In tandem with the role of the student, teachers, as responsible for prescribing homework assignments for students, also become central players in the process of completing homework assignments. The decisions that teachers make about homework prescriptions, and the amount and type of tasks they set, will determine, to a large extent, the quality of the homework process including the student ' s motivation and the student ' s level of engagement with homework. Furthermore, the fact that homework is useful, interesting and motivating for students, will depend on how the teacher prescribes those tasks and the connection established with classroom learning. Teacher feedback also acquires particular relevance for this point by helping the students to accurately estimate the quality of their progress and overcome the difficulties they may have encountered in carrying out their homework. Lastly, the effectiveness of teacher feedback depends on its contribution to the student ' s educational progress and how that student will perform in the future. In addition to the student who performs the task and the teacher who prescribes and corrects it, we must not lose sight of parents ' role. Although there are discrepancies regarding the role that parents play in relation to

homework, it is evident that their implication has important consequences not only on the final result of those tasks but also on the very process of carrying them out. Everything seems to indicate that the family environment and, more specifically, the support and feedback provided by parents is a factor that can determine the involvement of students in school duties. In this way, providing emotional support encouraging children to get involved can contribute positively to improving their motivation and interest in the performance of homework. The objective of this Research Topic is to provide researchers and professionals in psychology and education settings with some of the most recent empirical evidence regarding the homework process, its prescription and correction. Overall, we aim to cease making homework a source of conflict and controversy at the socio-educational level in order to provide useful instruments for improving the quality of student learning. This work was developed with the financing of the research projects EDU2013-44062-P (MINECO), EDU2017-82984-P (MEIC).

The Psychologist's Companion Jun 11 2021 This book is a guide to scientific communication for students and researchers in psychology and related subjects. It is unique in that it combines under one cover practically everything the reader needs to know to communicate effectively in articles, books, grant proposals, prospectuses, talks, and lectures. The emphasis is on tips and practical advice that social scientists can actually use to improve communication. Robert Sternberg reviews rules for effective prose in a variety of formats, debunks common misconceptions about writing, highlights commonly misused words and gives instruction on the preparation of tables, figures, and bibliographies. For the third edition, the author has added entirely new chapters on 'How to Win Acceptances from Psychology Journals: Twenty-One Tips for Better Writing', 'Writing a Grant or Contract Proposal', 'Writing Book Proposals' and 'Writing a Lecture', and has expanded the chapter on 'References for the Psychology Paper'. He has also updated the volume's references. This book is an essential purchase for all psychologists and aspiring psychologists.

Handbook of Demonstrations and Activities in the Teaching of Psychology Dec 25 2019 For those who teach students in psychology, education, and the social sciences, the Handbook of Demonstrations and Activities in the Teaching of Psychology, Second Edition provides practical applications and rich sources of ideas. Revised to include a wealth of new material (56% of the articles are new), these invaluable reference books contain the collective experience of teachers who have successfully dealt with students' difficulty in mastering important concepts about human behavior. Each volume features a table that lists the articles and identifies the primary and secondary courses in which readers can use each demonstration. Additionally, the subject index facilitates retrieval of articles according to topical headings, and the appendix notes the source as it originally appeared in Teaching of Psychology, the official journal of the Society for the Teaching of Psychology, Division Two of the American Psychological Association. Volume I consists of 97 articles about strategies for teaching introductory psychology, statistics, research methods, and the history of psychology classes. Divided into four sections (one for each specialty), the book suggests ways to stimulate interest, promote participation, grasp psychological terminology, and master necessary scientific skills.

Handbook of Research on Management Ideas and Panaceas Aug 13 2021 Over time management ideas and panaceas have been presented alternately as quick fix cures for all corporate ills and the emperor's new clothes, beset by flaws and problems. This Handbook provides a different approach, suggesting that management ideas and panaceas should not be either adopted or rejected outright, but gives guidance in the art of assessing and applying management ideas and panaceas to various situations and contexts. The contributors discuss the ways in which researchers, organizational actors and higher educational institutions (HEIs) can more wisely test the relevance of management

ideas and panaceas, and adapt these to fit organizations in various contexts. They conclude that, in order to accomplish wiser relevance-testing and adaptation, there is a need for diversity, critical examination and transparency. All students, scholars and researchers in management and organization with an interest in the adaptation and translation of management ideas and panaceas, will find this book to be of interest. Reflective practitioners will find the focus on context illuminating and helpful.

Idea and Methods of Legal Research May 22 2022 Legal research examines subject matter enshrouded in social circumstances in order to conceptualize theories and prepare a future course of action. This dynamic, interdisciplinary, and labyrinthine character of legal research requires researchers to be fluid, eclectic, and analytical in their approach. Idea and Methods of Legal Research unearths how the thinking process is to be streamlined in research, how a theme is built on the basis of comprehensive and intensive study, and the paths through which notions of objectivity, feminism, ethics, and purposive character of knowledge are to be understood. The book first explains the meaning, evolution, and scope of legal research, and discusses objectivity and ethics in legal research. It engages with the requirements, advantages, and limits of various doctrinal and non-doctrinal methods and tools, and the points to be considered in selecting a suitable method or combination of methods. It highlights analytical, historical, philosophical, comparative, qualitative, and quantitative methods of legal research. The book then goes on to discuss the use of multi-method legal research, policy research, action research, and feminist legal research and finally, reflects on research-based critical legal writing, as opposed to client-related legal writing. This book, thus, is a comprehensive answer to key questions one faces in legal research.

Major Research Topics in Combustion Apr 21 2022 The Institute for Computer Applications in Science and Engineering (ICASE) and NASA Langley Research Center (LaRC) brought together on October 2-4, 1989 experts in the various areas of combustion with a view to expose them to some combustion problems of technological interest to LaRC and possibly foster interaction with the academic community in these research areas. The topics chosen for this purpose were flame structure, flame stability, flame holding/extinction, chemical kinetics, turbulence-kinetics interaction, transition to detonation, and reacting free shear layers. The lead paper set the stage by discussing the status and issues of supersonic combustion relevant to scramjet engine. Then the experts were called upon i) to review the current status of knowledge in the aforementioned areas, ii) to focus on how this knowledge can be extended and applied to high-speed combustion, and iii) to suggest future directions of research in these areas. Each topic was then dealt with in a position paper followed by formal discussion papers and a general discussion involving the participants. The position papers discussed the state-of-the-art with an emphasis on key issues that needed to be resolved in the near future. The discussion papers critically examined these issues and filled in any lacunae therein. The edited versions of the general discussions in the form of questions from the audience and answers from the speakers are included whenever possible to give the reader the flavor of the lively interactions that took place.

The SAGE Encyclopedia of Communication Research Methods Oct 27 2022 Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader ' s Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader ' s Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.

The text also provides suggested research topics to further advance these skills. All readers will improve their creativity and gain a broader, more enriched world view.

Topics in Dietary Fiber Research Nov 16 2021 The study of plant fibers and their effect on human physiology has suddenly, after many years of comparative obscurity, been catapulted to the forefront of the scientific world. This new interest, first ignited by certain epidemiological reports, has been intensified by new research and by dramatization in the lay press. To counteract the dissemination of inaccurate information and to eliminate confusion, several authors have felt the need to make objective, unbiased reports available to the scientific community. The collection of papers in our own *Fiber in Human Nutrition* (Plenum Press, 1976) is one such effort. However, even as it was going to press, we realized that increased interest in specific areas of fiber research necessitated a more detailed and up-to-date look at certain topics. This book is directed to that purpose. The first volume of *Fiber in Human Nutrition* was designed as a basic reference textbook covering the entire spectrum of plant fibers from chemical, analytical, physicochemical, physiological, medical and epidemiological points of view. The present volume, which enlarges on specific aspects of dietary fiber, is offered as a supplement to *Fiber in Human Nutrition*. Together, the two volumes should be a most valuable source of information for the student of the scientific intricacies of fiber. An ongoing concern is that many of the substances dealt with in these and other "fiber" books are not, in the classical sense, of a fibrous nature at all.

Postgraduate Research in Business Jul 24 2022 In *Postgraduate Research in Business*, Sarah Quinton and Teresa Smallbone provide a vital introduction to the research process and the thinking and learning skills needed to successfully complete postgraduate research. Turning Ideas into Research Mar 20 2022 How do you turn a really good idea into a really good question, and how do you turn this into successful research? Barbara Fawcett and Rosalie Pockett use their expertise as supervisors and researchers to provide you with the frameworks and the theoretical and practical guidance you need to design, carry out and communicate your research effectively. Using a range of examples that relate research to the real world, they demonstrate: how to develop research questions how to select appropriate theoretical frameworks how to integrate theoretical perspectives with empirical research how to gather and interpret data how to ensure that the research undertaken makes a difference. The authors' user-friendly approach emphasizes the importance of participation, collaboration and inclusivity, and examines worldviews and understandings of knowledge in order to enable greater critical reflection. Chapters provide guidance on achieving impact with your research, and feature reflective questions to enhance your engagement with the issues covered. This text is the ideal companion as you set about transforming your ideas into robust research.

Brain and Art Oct 15 2021 Could we understand, in biological terms, the unique and fantastic capabilities of the human brain to both create and enjoy art? In the past decade neuroscience has made a huge leap in developing experimental techniques as well as theoretical frameworks for studying emergent properties following the activity of

large neuronal networks. These methods, including MEG, fMRI, sophisticated data analysis approaches and behavioral methods, are increasingly being used in many labs worldwide, with the goal to explore brain mechanisms corresponding to the artistic experience. The 37 articles composing this unique Frontiers Research Topic bring together experimental and theoretical research, linking state-of-the-art knowledge about the brain with the phenomena of Art. It covers a broad scope of topics, contributed by world-renowned experts in vision, audition, somato-sensation, movement, and cinema. Importantly, as we felt that a dialog among artists and scientists is essential and fruitful, we invited a few artists to contribute their insights, as well as their art. Joan Miró said that “ art is the search for the alphabet of the mind. ” This volume reflects the state of the art search to understand neurobiological alphabet of the Arts. We hope that the wide range of articles in this volume will be highly attractive to brain researchers, artists and the community at large.
