Building Our Dream in Remote Colorado Jul 19 2021 In 1971, after buying their acreage in a very remote area of the Colorado Mountains, the Wood family began to develop their dream ranch. The history and wild life of the area provides a fascinating backdrop for their story of adventure and discovery in the wilderness. From the first Americans to the mining era and the building of the railroads, Colorado is steeped in the glorious history of the Wild West. The property was located in the middle of a cow pasture with only marginal access and the closest electrical lines were over twelve miles away. With no means of communication and the closest town twenty-two miles away, the family had their work cut out for them. After surviving a devastating blizzard with thirty people in their home, they understood the importance of understanding survival techniques. Their crazy but true experiences are recounted with frankness and humor. By sharing his experiences and newly-gained knowledge, Wood has saved many of his friends hundreds of dollars, offering his advice on energy systems and the challenges of building in a remote area. Through perseverance and good old-fashioned hard work, he and his family built their dream ranch in the beautiful mountains of Colorado.

Sylvania, Lucas County, Ohio; Oct 22 2021 Join the author in reliving Sylvania's over 180 years of history from footpaths to expressways and beyond, in volume three of an eight volume set. With 30 years of research she has included every subject imaginable that helped bring Sylvania to where they are today, with excellent schools, over-the-top parks and recreation, rich beautiful homes, commercial and industrial businesses and a quaint historical downtown that looks like it was planned by Norman Rockwell himself. This book is a treasure trove of information for the thousands who have ancestors that once lived and helped Sylvania grow through these years. Located in northwestern Ohio, Sylvania is a suburb of Toledo, Ohio and for many years has been known as "the fastest growing suburb in Lucas County." A once rural farm community, between both the city and township they have grown from a combined 2,220 residents in 1910, to 48,487 in 2010. Over a short period of time the land has transformed into beautiful subdivisions of grand houses, so that now their subdivision names are all that remain to remind them of their once dense forests and sprawling farmlands. No longer can Sylvania be called the "bedroom community" of Toledo, because over the last 50 years they have done a lot more than sleep.

100-watt Curium-242 Fueled Thermoelectric Generator-conceptual Design Mar 15 2021 A thermoelectric generator which produces 100 watts of electrical power continuously over a six-month operational life in a space environment was designed. It employs the heat produced by the decay of Cm24 as the source of power. Uniform output over the operational life of the generator is accomplished by means of a thermally actuated shutter which maintains the hot junction temperature of the thermoelectric converter at a constant figure by varying the amount of surplus heat which is radiated directly to space from the heat source. The isotopic heat source is designed to safely contain the Cm/sup 242/ under conditions of launch pad abort and rocket failure, but to burn up upon re-entry to the earth's atmosphere from orbital velocity.
