Diverse Pedagogical Approaches to Experiential Learning, Volume II Jun 11 2021 This second volume of *Diverse Pedagogical Approaches to Experiential Learning* (Palgrave, 2020) contains a new collection of experiential learning (EL) reflections, case studies, and strategies written by twenty-eight authors across sixteen academic disciplines. Like the first volume, the chapters describe the process of developing, implementing, facilitating, expanding, and assessing EL in courses, programs, and centers both locally and globally. The authors take on new themes in this collection, including discussions on

the intersections of experiential learning with race and privilege, cross-cultural competencies, power and gender, professional development and vocational discernment, self-inquiry and reflection, social justice, and more. The authors also address the importance of adapting new pedagogical approaches to EL in response to challenges in higher education presented by the global coronavirus pandemic. Karen Lovett is Director of Experiential Learning at the University of Dayton, USA. Her research interests include how people learn through experience in diverse social contexts, and her work highlights the transformative impact of experiential learning on students and educators' lives.

Overcoming Religious Illiteracy Mar 08 2021 In *Overcoming Religious Illiteracy*, Harvard professor and Phillips Academy teacher Diane L. Moore argues that though the United States is one of the most religiously diverse nations in the world, the vast majority of citizens are woefully ignorant about religion itself and the basic tenets of the world's major religious traditions. The consequences of this religious illiteracy are profound and include fueling the culture wars, curtailing historical understanding and promoting religious and racial bigotry. In this volume, Moore combines theory with practice to articulate how to incorporate the study of religion into the schools in ways that will invigorate classrooms and enhance democratic discourse in the public sphere.

Handbook of Moral Motivation Jul 12 2021 The *Handbook of Moral Motivation* offers a contemporary and comprehensive appraisal of the age-old question about motivation to do the good and to prevent the bad. From a research point of view, this question remains open even though we present here a rich collection of new ideas and data. Two sources helped the editors to frame the chapters: first they looked at an overwhelmingly fruitful research tradition on motivation in general (attribution theory, performance theory, self-determination theory, etc.) in relationship to morality. The second source refers to the tension between moral judgment (feelings, beliefs) and the real moral act in a twofold manner: (a) as a necessary duty, and, (b) as a social but not necessary bond. In addition, the handbook utilizes the latest research from a wide range of disciplinary perspectives, wishing to suggest by this that the answer to the posed question will likely not come from one discipline alone. Furthermore, our hope is that the implicit criticism that the narrowly constructed research approach of the recent past has contributed to closing off rather than opening up interdisciplinary lines of research becomes in this volume a strong counter discourse. The editors and authors of the handbook commend the research contained within in the hope that it will contribute to better understanding of humanity as an inherently moral species.

To Kill a Mockingbird Aug 25 2022 Voted America's Best-Loved Novel in PBS's *The Great American Read* Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, *To Kill a Mockingbird* has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.

Reflective Practice, Second Edition: Transforming Education and Improving Outcomes Mar 20 2022 Nursing can be a physically and intellectually demanding profession, and most nursing programs focus on instilling the techniques and knowledge necessary to prepare novice nurses. Rarely addressed in nurse education, though, are the human and emotional factors that impact nurses at all levels from day one. compassion fatigue, and increasingly complex workplace and interpersonal issues that deplete energy and motivation. *Reflective Practice, Second Edition: Transforming Education and Improving Outcomes* offers educators and learners a path to incorporate Caring Science, emotional intelligence, and social justice into nursing education and practice. Authors Sara Horton-Deutsch and Gwen Sherwood provide a rich resource for academic and clinical nurse educators, students, and practicing nurses interested in developing leadership capacity or advancing professional development. *Reflective Practice* pulls together multiple approaches to reflective instruction for self-improvement through exercises that are adaptable to both personal life and professional work. Research on Enhancing the Interactivity of Online Learning May 30 2020 Our goal with this book, *Research on Enhancing the Interactivity of Online Learning*, is to present a juried, scholarly, and accessible review of research, theory, and/or policy on specific issues of interactive online learning for K-16 educators, administrators, and students of online learning. Online learning has become the norm rather than the exception for many of today’s students. Instructors are more willing to explore online learning options, students are enrolling in record numbers and colleges, as well as many K-12 institutions, are offering more online courses. As educators, we have more tools than ever to ensure online course success, but just as with a traditional class, we must continue to place emphasis on good pedagogy. To achieve good pedagogy, online teaching takes additional time and a restructuring of course content by the instructor. Student issues include coping strategies, ease of navigation, skills required to complete the course, availability of online resources, feedback from the instructor, and collaborative, interactive learning opportunities. Principles of interactive online learning are new to many, and this book provides a forum for interactive online learning research while also including ideas that enhance both the practical and theoretical aspects of interactive online learning. The editors have included chapters that can further knowledge and understanding of emerging trends and foster debate regarding issues that surround interactive online learning.

Reflection In The Writing Classroom Feb 25 2020 Yancey explores reflection as a promising body of practice and inquiry in the writing classroom. Yancey develops a line of research based on concepts of philosopher Donald Schon and others involving the role of deliberative reflection in classroom contexts. Developing the concepts of reflection-in-action, constructive reflection, and reflection-in-presentation, she offers a structure for discussing how reflection operates as students compose individual pieces of writing, as they progress through successive writings, and as they deliberately review a compiled body of their work—a portfolio, for example. Throughout the book, she explores how reflection can enhance student learning along with teacher response to and evaluation of student writing. *Reflection in the Writing Classroom* will be a valuable addition to the personal library of faculty currently teaching in or administering a writing program; it is also a natural for graduate students who teach writing courses, for the TA training program, or for the English Education program.

I am considered a German spy, an agent of Bismarck, they say I am a Protestant, a freemason, a sorcerer, a damned soul and evil. It is whispered that I want to draw plans, that I have a foreign passport and that I wander through the streets by night ..."

While highlighting topics, such as cultural competency, teacher development, and multicultural education, this book explores the benefits, challenges, and opportunities for employing community service as the driving framework for field experiences. This publication is a vital resource for practitioners, educators, faculty, and administrators seeking current research on the opportunity of field involvement to enhance teacher candidates' experiences and provide a channel for meaningful learning.

Teaching Civic Engagement Apr 28 2020 Using a new model focused on four core capacities--intellectual complexity, social location, empathetic accountability, and motivated action--*Teaching Civic Engagement* explores the significance of religious studies in fostering a vibrant, just, and democratic civic order. In the first section of the book, contributors detail this theoretical model and offer an initial application to the sources and methods that already define much teaching in the disciplines of religious studies and theology. A second section offers chapters focused on specific strategies for teaching civic engagement in religion classrooms, including traditional textual studies, reflective writing, community-based learning, field trips, media analysis, ethnographic methods, direct community engagement and a reflective practice of "ascetic withdrawal." The final section of the volume explores theoretical issues, including the delimitation of the "civic" as a category, connections between local and global in the civic project, the question of political advocacy in the classroom, and the role of normative commitments. Collectively these chapters illustrate the real possibility of connecting the scholarly study of religion with the societies in which we, our students, and our institutions exist. The contributing authors model new ways of engaging questions of civic belonging and social activism in the religion classroom, belying the stereotype of the ivory tower intellectual.
