Thank you for reading **Dell Inspiron 15r User Guide**. Maybe you have knowledge that, people have search hundreds times for their favorite novels like this Dell Inspiron 15r User Guide, but end up in malicious downloads.

Rather than reading a good book with a cup of coffee in the afternoon, instead they juggled with some harmful virus inside their computer.

Dell Inspiron 15r User Guide is available in our digital library an online access to it is set as public so you can get it instantly.

Our books collection hosts in multiple countries, allowing you to get the most less latency time to download any of our books like this one.

Kindly say, the Dell Inspiron 15r User Guide is universally compatible with any devices to read

Soft Computing and Signal Processing Jul 25 2022 This book presents selected research papers on current developments in the fields of soft computing and signal processing from the Third International Conference on Soft Computing and Signal Processing (ICSCSP 2020). The book covers topics such as soft sets, rough sets, fuzzy logic, neural networks, genetic algorithms and machine learning and discusses various

aspects of these topics, e.g., technological considerations, product implementation and application issues.

The Earthquake Prophet Nov 24 2019 In this distinctive collection of thirty-nine short stories, author David H. Brandin mixes satire and political incorrectness with startling story-line twists in the tradition of O. Henry. Divided into four parts, *The Earthquake Prophet* combines modern history, fantasy, and current events to deliver a treasure trove of prose. Brandin delves into a variety of subjects that range from earthquake prediction and World War II to the hot political topics of today such as global warming, sanctuary cities, and TSA's no-fly lists. With wit and his own unique brand of humor, Brandin offers an interesting explanation for the collapse of the American economic system; deftly describes the inanity of professional politicians; exposes corruption in the judicial system; and skewers high-stakes issues in national security. Stories also explore how the ordinary can turn extraordinary. Scuba diving takes a strange turn, a piano lesson lapses into terror, and an unusual Texas slot machine creates quite the controversy. Blending political, historical, and general fiction with tales of science fiction and fantasy, *The Earthquake Prophet* promises a fascinating literary adventure.

Advances in Information and Communication Jul 01 2020 This book presents a remarkable collection of chapters that cover a wide range of topics in the areas of information and communication technologies and their real-world applications. It gathers the Proceedings of the Future of Information and Communication Conference 2019 (FICC 2019), held in San Francisco, USA from March 14 to 15, 2019. The conference attracted a total of 462 submissions from pioneering researchers, scientists, industrial engineers, and students from all around the world. Following a double-blind peer review process, 160 submissions (including 15 poster papers) were ultimately selected for inclusion in these proceedings. The papers highlight relevant trends in, and the latest research on: Communication, Data Science, Ambient Intelligence, Networking, Computing, Security, and the Internet of Things. Further, they address all aspects of Information Science and communication technologies, from classical to intelligent, and both the theory and applications of the latest technologies and methodologies. Gathering chapters that discuss state-of-the-art intelligent methods and techniques for solving real-world problems, along with future research directions, the book represents both an interesting read and a valuable asset.

Proceedings of First International Conference on Computational Electronics for Wireless Communications Jun 19 2019 This book includes high-quality papers presented at Proceedings of First International Conference on Computational Electronics for Wireless Communications (ICCEWC 2021), held at National Institute of Technology, Kurukshetra, Haryana, India, during June 11–12, 2021. The book presents original research work of academics and industry professionals to exchange their knowledge of the state-of-the-art research and development in computational electronics with an emphasis on wireless communications. The topics covered in the book are radio frequency and microwave, signal processing, microelectronics and wireless networks.

ITNG 2022 19th International Conference on Information Technology-New Generations Dec 26 2019 This volume represents the 19th International Conference on Information Technology - New Generations (ITNG), 2022. ITNG is an annual event focusing on state of the art technologies pertaining to digital information and communications. The applications of advanced information technology to such domains as astronomy, biology, education, geosciences, security, and health care are among topics of relevance to ITNG. Visionary ideas, theoretical and experimental results, as well as prototypes, designs, and tools that help the information readily flow to the user are of special interest. Machine Learning, Robotics, High Performance Computing, and Innovative Methods of Computing are examples of related topics. The conference features keynote speakers, a best student award, poster award, and service award. . This publication is unique as it captures modern trends in IT with a balance of theoretical and experimental work. Most other work focus either on theoretical or experimental, but not

both. Accordingly, we do not know of any competitive literature.

Recommender Systems Aug 14 2021 Recommender systems use information filtering to predict user preferences. They are becoming a vital part of e-business and are used in a wide variety of industries, ranging from entertainment and social networking to information technology, tourism, education, agriculture, healthcare, manufacturing, and retail. *Recommender Systems: Algorithms and Applications* dives into the theoretical underpinnings of these systems and looks at how this theory is applied and implemented in actual systems. The book examines several classes of recommendation algorithms, including Machine learning algorithms Community detection algorithms Filtering algorithms Various efficient and robust product recommender systems using machine learning algorithms are helpful in filtering and exploring unseen data by users for better prediction and extrapolation of decisions. These are providing a wider range of solutions to such challenges as imbalanced data set problems, cold-start problems, and long tail problems. This book also looks at fundamental ontological positions that form the foundations of recommender systems and explain why certain recommendations are predicted over others. Techniques and approaches for developing recommender systems are also investigated. These can help with implementing algorithms as systems and include A latent-factor technique for model-based filtering systems Collaborative filtering approaches Content-based approaches Finally, this book examines actual systems for social networking, recommending consumer products, and predicting risk in software engineering projects.

Intelligent Information and Database Systems Mar 09 2021 The two-volume set LNAI 10191 and 10192 constitutes the refereed proceedings of the 9th Asian Conference on Intelligent Information and Database Systems, ACIIDS 2017, held in Kanazawa, Japan, in April 2017. The total of 152 full papers accepted for publication in these proceedings was carefully reviewed and selected from 420 submissions. They were organized in topical sections named: Knowledge Engineering and Semantic Web; Social Networks and Recommender Systems; Text Processing and Information Retrieval; Intelligent Database Systems; Intelligent Information Systems; Decision Support and Control Systems; Machine Learning and Data Mining; Computer Vision Techniques; Advanced Data Mining Techniques and Applications; Intelligent and Context Systems; Multiple Model Approach to Machine Learning; Applications of Data Science; Artificial Intelligence Applications for E-services; Automated Reasoning and Proving Techniques with Applications in Intelligent Systems; Collective Intelligence for Service Innovation, Technology Opportunity, E-Learning and Fuzzy Intelligent Systems; Intelligent Computer Vision Systems and Applications; Intelligent Data Analysis, Applications and Technologies for Internet of Things; Intelligent Algorithms and Brain Functions; Intelligent Systems and Algorithms in Information Sciences; IT in Biomedicine; Intelligent Technologies in the Smart Cities in the 21st Century; Analysis of Image, Video and Motion Data in Life Sciences; Modern Applications of Machine Learning for Actionable Knowledge Extraction; Mathematics of Decision Sciences and Information Science; Scalable Data Analysis in Bioinformatics and Biomedical Informatics; and Technological Perspective of Agile Transformation in IT organizations.

Implementing Enterprise Cybersecurity with Opensource Software and Standard Architecture Apr 29 2020 Many small and medium scale businesses cannot afford to procure expensive cybersecurity tools. In many cases, even after procurement, lack of a workforce with knowledge of the standard architecture of enterprise security, tools are often used ineffectively. The Editors have developed multiple projects which can help in developing cybersecurity solution architectures and the use of the right tools from the opensource software domain. This book has 8 chapters describing these projects in detail with recipes on how to use opensource tooling to obtain standard cyber defense and the ability to do

self-penetration testing and vulnerability assessment. This book also demonstrates work related to malware analysis using machine learning and implementation of honeypots, network Intrusion Detection Systems in a security operation center environment. It is essential reading for cybersecurity professionals and advanced students.

Wireless Algorithms, Systems, and Applications Dec 06 2020 The three-volume set LNCS 12937 - 12939 constitutes the proceedings of the 16th International Conference on Wireless Algorithms, Systems, and Applications, WASA 2021, which was held during June 25-27, 2021. The conference took place in Nanjing, China. The 103 full and 57 short papers presented in these proceedings were carefully reviewed and selected from 315 submissions. The following topics are covered in Part I of the set: network protocols, signal processing, wireless telecommunication systems, blockchain, IoT and edge computing, artificial intelligence, computer security, distributed computer systems, machine learning, and others.

Start Your Own Wedding Consultant Business Apr 22 2022 Say "I Do" to Success From wedding bells to wedding bills, gain an inside look at the billion dollar wedding industry and learn how to earn your next pay check coordinating the "big" day of today's brides and grooms. Discover the newest wedding trends, such as destination weddings, tapas-style catering, disposable video cameras, wedding logos and more. Plus, learn everything else you need to know to start and run a successful wedding consultant business, including: How to market your services and find customers Using social media to attract and communicate with clients Tips from the pros for handling the unexpected What licenses and permits you need How to avoid common mistakes How to negotiate with vendors and suppliers to get the best prices The most important contacts to make And more! You don't need an office or a lot of startup money. With your creativity and help from our experts, you'll be well on your way to success!

Looking Forward, Looking Back: Drawing on the Past to Shape the Future of Marketing Jan 19 2022 ?This volume includes the full proceedings from the 2013 World Marketing Congress held in Melbourne, Australia with the theme Looking Forward, Looking Back: Drawing on the Past to Shape the Future of Marketing. The focus of the conference and the enclosed papers is on marketing thought and practices throughout the world. This volume resents papers on various topics including marketing management, marketing strategy, and consumer behavior. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights, complimenting the Academy's flagship journals, the Journal of the Academy of Marketing Science (JAMS) and AMS Review. Volumes are edited by leading scholars and practitioners across a wide range of subject areas in marketing science.?

Developments in Information & Knowledge Management for Business Applications Jan 07 2021 This book provides practical knowledge on different aspects of information and knowledge management in businesses. For enterprises/businesses those intend to remain prosperous and prolific, it is critically important to share best practices, ensure efficient information flow across company, capturing shared knowledge centrally, and communicate compliance rules, i.e. managing competently information in general. It enables faster and better decisions by helping employees' to build a strong expertise and by avoiding duplicated projects. Thus, the second volume of this series subtitle continues to explore different aspects of information and knowledge handling as well as doing business with information. We survey further the key aspects of managerial implications of the informational business. The novel methodologies and practices for the business information processing as well as

application of mathematical models to the business analytics and efficient management are examined.

XXVI Brazilian Congress on Biomedical Engineering May 23 2022 This volume presents the proceedings of the Brazilian Congress on Biomedical Engineering (CBEB 2018). The conference was organised by the Brazilian Society on Biomedical Engineering (SBEB) and held in Armação de Buzios, Rio de Janeiro, Brazil from 21-25 October, 2018. Topics of the proceedings include these 11 tracks: • Bioengineering • Biomaterials, Tissue Engineering and Artificial Organs • Biomechanics and Rehabilitation • Biomedical Devices and Instrumentation • Biomedical Robotics, Assistive Technologies and Health Informatics • Clinical Engineering and Health Technology Assessment • Metrology, Standardization, Testing and Quality in Health • Biomedical Signal and Image Processing • Neural Engineering • Special Topics • Systems and Technologies for Therapy and Diagnosis

Conceptual Modeling Apr 10 2021 This book constitutes the refereed proceedings of the 34th International Conference on Conceptual Modeling, ER 2015, held in Stockholm, Sweden, in October 2015. The 26 full and 19 short papers presented were carefully reviewed and selected from 131 submissions. The papers are organized in topical sections on business process and goal models, ontology-based models and ontology patterns, constraints, normalization, interoperability and integration, collaborative modeling, variability and uncertainty modeling, modeling and visualization of user generated content, schema discovery and evolution, process and text mining, domain-based modeling, data models and semantics, and applications of conceptual modeling.

Quantification of Uncertainty: Improving Efficiency and Technology Jul 21 2019 This book explores four guiding themes – reduced order modelling, high dimensional problems, efficient algorithms, and applications – by reviewing recent algorithmic and mathematical advances and the development of new research directions for uncertainty quantification in the context of partial differential equations with random inputs. Highlighting the most promising approaches for (near-) future improvements in the way uncertainty quantification problems in the partial differential equation setting are solved, and gathering contributions by leading international experts, the book's content will impact the scientific, engineering, financial, economic, environmental, social, and commercial sectors.

Computer Security - ESORICS 2014 Oct 28 2022 The two-volume set, LNCS 8712 and LNCS 8713 constitutes the refereed proceedings of the 19th European Symposium on Research in Computer Security, ESORICS 2014, held in Wrocław, Poland, in September 2014. The 58 revised full papers presented were carefully reviewed and selected from 234 submissions. The papers address issues such as cryptography, formal methods and theory of security, security services, intrusion/anomaly detection and malware mitigation, security in hardware, systems security, network security, database and storage security, software and application security, human and societal aspects of security and privacy.

Resource Management in Mobile Computing Environments Feb 08 2021 This book reports the latest advances on the design and development of mobile computing systems, describing their applications in the context of modeling, analysis and efficient resource management. It explores the challenges on mobile computing and resource management paradigms, including research efforts and approaches recently carried out in response to them to address future open-ended issues. The book includes 26 rigorously refereed chapters written by leading international researchers, providing the readers with technical and scientific information about various aspects of mobile computing, from basic concepts to advanced findings, reporting the state-of-the-art on resource management in such environments. It is mainly intended as a reference guide for researchers and practitioners involved in the design, development and applications of mobile computing systems, seeking solutions to related issues. It also represents a useful textbook for advanced undergraduate and graduate courses, addressing special topics such as: mobile and ad-hoc wireless networks; peer-to-peer systems for mobile computing; novel resource management techniques in cognitive radio networks; and

power management in mobile computing systems.

New Knowledge in Information Systems and Technologies Sep 03 2020 This book includes a selection of articles from The 2019 World Conference on Information Systems and Technologies (WorldCIST'19), held from April 16 to 19, at La Toja, Spain. WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences and challenges in modern information systems and technologies research, together with their technological development and applications. The book covers a number of topics, including A) Information and Knowledge Management; B) Organizational Models and Information Systems; C) Software and Systems Modeling; D) Software Systems, Architectures, Applications and Tools; E) Multimedia Systems and Applications; F) Computer Networks, Mobility and Pervasive Systems; G) Intelligent and Decision Support Systems; H) Big Data Analytics and Applications; I) Human-Computer Interaction; J) Ethics, Computers & Security; K) Health Informatics; L) Information Technologies in Education; M) Information Technologies in Radiocommunications; and N) Technologies for Biomedical Applications.

Intelligent Systems, Technologies and Applications Oct 24 2019 This book explores and discusses various aspects of intelligent systems technologies and their applications. Presenting the refereed post-conference proceedings of the 5th International Symposium on Intelligent Systems Technologies and Applications (ISTA 2019), held at the Indian Institute of Information Technology and Management-Kerala (IIITM-K), Trivandrum, India, on December 18-21, 2019, it covers a variety of topics, such as knowledge discovery, data mining, pattern recognition, signal processing, intelligent image processing, artificial vision, ad hoc and wireless sensor networks, business intelligence and big data analytics.

Programming for Problem Solving (U.P.) Mar 29 2020 Programming for Problem Solving (U.P.)

Smart Multimedia Oct 16 2021 This book constitutes the proceedings of the First International Conference on Smart Multimedia, ICSM 2018, which was held in Toulon, France, in August 2018. The 39 papers presented were selected from about 100 submissions and are grouped in sections on social, affective and cognition analysis, person-centered smart multimedia: serving people with disabilities to the general population, haptic and robots for smart multimedia applications, MR, 3D, underwater image processing, smart signal processing meets smart sensing, visual behavior analysis: methods and applications, video analysis, learning, low-level vision, miscellaneous.

Top Screwups Doctors Make and How to Avoid Them Mar 21 2022 A primary care doctor is skeptical of his patient's concerns. A hospital nurse or intern is unaware of a drug's potential side effects. A physician makes the most "common" diagnosis while overlooking the signs of a rarer and more serious illness, and the patient doesn't see the necessary specialist until it's too late. A pharmacist dispenses the wrong drug and a patient dies as a result. Sadly, these kinds of mistakes happen all the time. Each year, 6.1 million Americans are harmed by diagnostic mistakes, drug disasters, and medical treatments. A decade ago, the Institute of Medicine estimated that up to 98,000 people died in hospitals each year from preventable medical errors. And new research from the University of Utah, HealthGrades of Denver, and elsewhere suggests the toll is much higher. Patient advocates and bestselling authors Joe and Teresa Graedon came face-to-face with the tragic consequences of doctors' screwups when Joe's mother died in Duke Hospital—one of the best in the world—due to a disastrous series of entirely preventable errors. In *Top Screwups Doctors Make and How to Avoid Them*, the Graedons expose the most common medical mistakes, from doctor's offices and hospitals to the pharmacy counters and nursing homes. Patients across the country shared their riveting horror stories, and doctors recounted the disastrous—and sometimes deadly—consequences of their colleagues' oversights and errors. While many patients feel vulnerable and dependent on their health care providers, this book is a startling wake-up call to how wrong doctors can be. The good news is that we can protect ourselves, and our loved ones, by being educated and vigilant medical consumers. The Graedons give patients the specific,

practical steps they need to take to ensure their safety: the questions to ask a specialist before getting a final diagnosis, tips for promoting good communication with your doctor, presurgery checklists, how to avoid deadly drug interactions, and much more. Whether you're sick or healthy, young or old, a parent of a young child, or caring for an elderly loved one, *Top Screwups Doctors Make and How to Avoid Them* is an eye-opening look at the medical mistakes that can truly affect any of us—and an empowering guide that explains what we can do about it.

Advances in Artificial Intelligence: From Theory to Practice May 11 2021 The two-volume set LNCS 10350 and 10351 constitutes the thoroughly refereed proceedings of the 30th International Conference on Industrial, Engineering and Other Applications of Applied Intelligent Systems, IEA/AIE 2017, held in Arras, France, in June 2017. The 70 revised full papers presented together with 45 short papers and 3 invited talks were carefully reviewed and selected from 180 submissions. They are organized in topical sections: constraints, planning, and optimization; data mining and machine learning; sensors, signal processing, and data fusion; recommender systems; decision support systems; knowledge representation and reasoning; navigation, control, and autonome agents; sentiment analysis and social media; games, computer vision; and animation; uncertainty management; graphical models: from theory to applications; anomaly detection; agronomy and artificial intelligence; applications of argumentation; intelligent systems in healthcare and mhealth for health outcomes; and innovative applications of textual analysis based on AI.

Brand Competition and Consumer Preference of the Chinese 3C Markets Sep 27 2022 Using big data analytics, this research covers top 3C (computer, communications, consumer electronics) brands sold on China's online stores Tmall and JD with following analysis dimensions: brand ranking by the number of items available, ranking by product sales, number of times online users mention about a particular brand, brand preferences, factors affecting purchase, as well as online shoppers' comments and user analysis. All those dimensions help build a massive social media database with an aim to more accurately reflect consumer needs in China.

Sustainable and Energy Efficient Computing Paradigms for Society Jan 27 2020 This book provides insights into recent trends and innovation of technologies aiming to provide sustainable and energy efficient computing. The authors discuss approaches to provide solutions to real life societal issues and problems using sustainable and energy efficient computing approaches. The book gathers research and state of the art reviews on solutions for societal benefits by using sustainable approaches of computing. The book also intends to provide use-cases for certain real life societal problems. The book can be used by researchers of similar areas, technologists, environmentalists, educationists, research scholars and UG/PG Students as well.

Windows 10 All-in-One For Dummies Feb 26 2020 Dig into the ins and outs of Windows 10 Computer users have been “doing Windows” since the 1980s. That long run doesn't mean everyone knows the best-kept secrets of the globally ubiquitous operating system. *Windows 10 All-in-One For Dummies*, 4th Edition offers a deep guide for navigating the basics of Windows 10 and diving into more advanced features. Authors and recognized Windows experts Ciprian Rusen and Woody Leonhard deliver a comprehensive and practical resource that provides the knowledge you need to operate Windows 10, along with a few shortcuts to make using a computer feel less like work. This book teaches you all about the most important parts of Windows 10, including: Installing and starting a fresh Windows 10 installation Personalizing Windows 10 Using Universal Apps in Windows 10 How to control your system through the Control Panel in Windows 10 Securing Windows 10 against a universe of threats *Windows 10 All-in-One For Dummies*, 4th Edition is perfect for business users of Windows 10 who need to maximize their productivity and efficiency with the operating system. It also belongs on the bookshelf of anyone who hopes to improve their general Windows 10 literacy, from the complete novice to the power-user.

Bricks Matter Sep 15 2021 Get proven guidance to build a market-driven supply chain management system Supply chain management processes have gradually shifted from a supply-driven focus to a demand-driven one in order to better synchronize demand and supply signals. Bricks Matter shows you how you can identify market risks and opportunities and translate these into winning tactics. Business cases highlight how business leaders are winning through market-driven approaches. Helps you understand how to apply the emerging world of predictive analytics for the better management of value networks Includes business cases illustrating the market-driven approach Reveals how businesses can identify market risks and translate these into supply-side tactics As companies transition from demand-driven to market-driven approach, the focus in organizations shifts from one of vertical excellence to building strong market-to-market horizontal processes. Improve revenue by increasing market share, improve profit margins, and maintain high levels of customer service with the indispensable guidance found in Bricks Matter.

Advances in Service and Industrial Robotics Jul 13 2021 This book presents the proceedings of the 31st International Conference on Robotics in Alpe-Adria-Danube Region (RAAD), held in Klagenfurt, Austria, June 8-10, 2022. It gathers contributions by researchers from several countries on all major areas of robotic research, development and innovation, as well as new applications and current trends. The topics covered include: novel designs and applications of robotic systems, intelligent cooperating and service robots, advanced robot control, human-robot interfaces, robot vision systems, mobile robots, humanoid and walking robots, bio-inspired and swarm robotic systems, aerial, underwater and spatial robots, robots for ambient assisted living, medical robots and bionic prostheses, cognitive robots, cloud robotics, ethical and social issues in robotics, etc. Given its scope, the book offers a source of information and inspiration for researchers seeking to improve their work and gather new ideas for future developments. Chapter "The Use of Robots in Aquatic Biomonitoring with Special Focus on Biohybrid Entities" is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Computational Collective Intelligence Feb 20 2022 This two-volume set (LNAI 9875 and LNAI 9876) constitutes the refereed proceedings of the 8th International Conference on Collective Intelligence, ICCCI 2016, held in Halkidiki, Greece, in September 2016. The 108 full papers presented were carefully reviewed and selected from 277 submissions. The aim of this conference is to provide an internationally respected forum for scientific research in the computer-based methods of collective intelligence and their applications in (but not limited to) such fields as group decision making, consensus computing, knowledge integration, semantic web, social networks and multi-agent systems.

Kiplinger's Personal Finance Jun 24 2022 The most trustworthy source of information available today on savings and investments, taxes, money management, home ownership and many other personal finance topics.

Computational Science and Its Applications – ICCSA 2019 Aug 22 2019 The six volumes LNCS 11619-11624 constitute the refereed proceedings of the 19th International Conference on Computational Science and Its Applications, ICCSA 2019, held in Saint Petersburg, Russia, in July 2019. The 64 full papers, 10 short papers and 259 workshop papers presented were carefully reviewed and selected from numerous submissions. The 64 full papers are organized in the following five general tracks: computational methods, algorithms and scientific applications; high performance computing and networks; geometric modeling, graphics and visualization; advanced and emerging applications; and information systems and technologies. The 259 workshop papers were presented at 33 workshops in various areas of computational sciences,

ranging from computational science technologies to specific areas of computational sciences, such as software engineering, security, artificial intelligence and blockchain technologies.

Cable-Driven Parallel Robots Dec 18 2021 This volume presents the outcome of the second forum to cable-driven parallel robots, bringing the cable robot community together. It shows the new ideas of the active researchers developing cable-driven robots. The book presents the state of the art, including both summarizing contributions as well as latest research and future options. The book cover all topics which are essential for cable-driven robots: Classification Kinematics, Workspace and Singularity Analysis Statics and Dynamics Cable Modeling Control and Calibration Design Methodology Hardware Development Experimental Evaluation Prototypes, Application Reports and new Application concepts.

Computational Intelligence in Machine Learning Jun 12 2021 The book includes select proceedings of the International Conference on Computational Intelligence in Machine Learning (ICCIML 2021). The book constitutes peer-reviewed papers on machine learning, computational intelligence, the internet of things, and smart city applications emphasizing multi-disciplinary research in artificial intelligence and cyber-physical systems. This book addresses the comprehensive nature of computational intelligence, artificial intelligence, machine learning, and deep learning to emphasize its character in modeling, identification, optimization, prediction, forecasting, and control of future intelligent systems. The book will be useful for researchers, research scholars, and students to formulate their research ideas and find future directions in these areas. It will help the readers to solve a diverse range of problems in industries and their real-world applications.

Evangelist Marketing Aug 26 2022 In *Evangelist Marketing*, Alex Goldfayn argues that technology companies succeed in spite of their marketing, not because of it. He says that if consumer tech makers ceased all marketing activity today, they would not see a significant decline in sales. In this book, Alex presents why the current state of overly-technical, features-oriented tech marketing, branding, communications and public relations is costing the industry billions of dollars—easy money that's voluntarily being left on the table. Then he lays out a step-by-step system for creating intensely loyal brand evangelists based on deep consumer insights and simple, emotional language. *Evangelist Marketing* is written for consumer tech companies big and small—from PC manufacturers to Web-based services. It's also sure to improve the work of their marketing and public relations agencies.

Wedding Consultant Business Nov 17 2021 *Say I Do to Success* From wedding bells to wedding bills, gain an inside look at the billion dollar wedding industry and learn how to earn your next pay check coordinating the big day of today's brides and grooms. Discover the newest wedding trends, such as destination weddings, tapas-style catering, disposable video cameras, wedding logos and more. Plus, learn everything else you need to know to start and run a successful wedding consultant business, including:

- How to market your services and find customers
- Using social media to attract and communicate with clients
- Tips from the pros for handling the unexpected
- What licenses and permits you need
- How to avoid common mistakes
- How to negotiate with vendors and suppliers to get the best prices
- The most important contacts to make
- And more!

You don't need an office or a lot of startup money. With your creativity and help from our experts, you'll be well on your way to success. *The First Three Years* In addition to industry specific information, you'll also tap into Entrepreneur's more than 30 years of small business expertise via the 2nd section of the guide - *Start Your Own Business*. SYOB offers critical startup essentials and a current, comprehensive view of what it takes to survive the crucial first three years, giving you exactly what you need to survive and succeed. Plus, you'll get advice and insight from experts and practicing entrepreneurs, all offering common-sense approaches and solutions to a wide range of challenges.

- Pin point your target market
- Uncover creative financing for startup and growth
- Use online resources to streamline your business

plan • Learn the secrets of successful marketing • Discover digital and social media tools and how to use them • Take advantage of hundreds of resources • Receive vital forms, worksheets and checklists • From startup to retirement, millions of entrepreneurs and small business owners have trusted Entrepreneur to point them in the right direction. We'll teach you the secrets of the winners, and give you exactly what you need to lay the groundwork for success. BONUS: Entrepreneur's Startup Resource Kit! Every small business is unique. Therefore, it's essential to have tools that are customizable depending on your business's needs. That's why with Entrepreneur is also offering you access to our Startup Resource Kit. Get instant access to thousands of business letters, sales letters, sample documents and more – all at your fingertips! You'll find the following: The Small Business Legal Toolkit When your business dreams go from idea to reality, you're suddenly faced with laws and regulations governing nearly every move you make. Learn how to stay in compliance and protect your business from legal action. In this essential toolkit, you'll get answers to the "how do I get started?" questions every business owner faces along with a thorough understanding of the legal and tax requirements of your business. Sample Business Letters 1000+ customizable business letters covering each type of written business communication you're likely to encounter as you communicate with customers, suppliers, employees, and others. Plus a complete guide to business communication that covers every question you may have about developing your own business communication style. Sample Sales Letters The experts at Entrepreneur have compiled more than 1000 of the most effective sales letters covering introductions, prospecting, setting up appointments, cover letters, proposal letters, the all-important follow-up letter and letters covering all aspects of sales operations to help you make the sale, generate new customers and huge profits.
