*Advanced Concepts for Intelligent Vision Systems* Apr 21 2022 This book constitutes the thoroughly refereed proceedings of the 15th International Conference on Advanced Concepts for Intelligent Vision Systems, ACIVS 2013, held in Poznań, Poland, in October 2013. The 63 revised full papers were carefully selected from 111 submissions. The topics covered are acquisition, pre-processing and coding, biometry, classification and recognition, depth, 3D and tracking, efficient implementation and frameworks, low level image analysis, segmentation and video analysis.

[Recent Concepts in Sarcoma Treatment](#) Dec 25 2019 There have been significant advances in the treatment of sarcomas in the past several years. Further, different clinical treatment programs are being advocated in different areas including surgery alone, surgery with preoperative or post operative chemotherapy, surgery with different radiotherapy modalities, with each investigator espousing his own treatment program. On the other side, there is the question of whether these treatment programs are offering better results or whether the natural history of sarcomas has changed. The International Symposium on Sarcomas was held at Innisbrook Resort, Tarpon Springs, Florida, October 8-10, 1987. This was the first international symposium to date involving all of the disciplines treating sarcomas including pathologists, orthopaedic surgeons, general surgeons, medical oncologists, pediatric oncologists, and radiation oncologists. The Symposium brought together a number of specialists working in the clinical field of sarcomas for a presentation of their specific treatment programs and their results. The presentations were followed by panel discussions to stimulate educational debate as to the different forms of treatment for sarcomas and to formulate some conformity in control of disease, control of spread, and ultimate function for the patient. James R. Ryan, M.D.

*Project Management* Mar 28 2020 The goal of the new edition is to continue with a systems view of the world. For a more

robust and worldwide market dissemination, the new edition has changed to a reference book. The project systems approach to project management, is needed in executing projects across countries and across cultures, which is a crucial requirement in today's globalized and intertwined economics. The book uses ample graphical representations to clarify the concepts and techniques presented. The case examples help to reinforce the topics covered. Several illustrative examples and practice exercises are included. Each chapter is updated and new chapters include Project Simulation and Project Templates. A new chapter on managing complex projects in an age of artificial intelligence adds a unique value to the book. Features Highlights contemporary best practices of project management Uses a systems framework to integrate quantitative and qualitative tools Offers illustrative examples and practice exercises Covers project schedule performance appraisal techniques Discusses the knowledge areas contained in the Project Management Book of Knowledge (PMBOK) Presents software applications for project management, as well as case examples

**Social Computing, Behavioral-Cultural Modeling and Prediction** Feb 07 2021 This book constitutes the proceedings of the 6th International Conference on Social Computing, Behavioral-Cultural Modeling and Prediction, SBP 2013, held in Washington, DC, USA in April 2013. The total of 57 contributions, which consists of papers and posters, included in this volume was carefully reviewed and selected from 137 submissions. This conference is strongly committed to multidisciplinary, consistent with recent trends in computational social science and related fields. The topics covered are: behavioral science, health sciences, military science and information science. There are also many papers that provide methodological innovation as well as new domain-specific findings.

**Mathematical Interest Theory** May 30 2020 Mathematical Interest Theory gives an introduction to how investments grow over time in a mathematically precise manner. The emphasis is on practical applications that give the reader a concrete understanding of why the various relationships should be true. Among the modern financial topics introduced are: arbitrage, options, futures, and swaps. The content of the book, along with an understanding of probability, will provide a solid foundation for readers embarking on actuarial careers. Mathematical Interest Theory includes more than 240 carefully worked examples. There are over 430 problems, and numerical answers are included in an appendix. A companion student solution manual has detailed solutions to the odd-numbered problems. Key Features • Detailed instruction on how to use the Texas Instruments BA II Plus and BA II Plus professional calculators. • Examples are worked out with the problem and solution delineated so that the reader can think about the problem before reading the solution presented in the text • Key formulas, facts and algorithms placed in boxes so that they stand out in the text, and new terms printed in boldface as they are introduced • Descriptive titles are given for the examples in the book, (i.e., "Finding  $a(t)$  from  $?t$ " or "Finding a bond's yield rate") to help students skimming the book quickly find relevant material. • Exercises feature applied financial questions, • Writing activities for each chapter introduce each homework set.

Conceptual Modeling Sep 26 2022 This book constitutes the refereed proceedings of the 37th International Conference on Conceptual Modeling, ER 2018, held in Xi'an, China, in October 2018. The 30 full and 13 short papers presented together

with 3 keynotes were carefully reviewed and selected from 151 submissions. This events covers a wide range of following topics: Conceptual modeling studies, ontological modeling, semi-structured data modeling, process modeling and management, spatio-temporal modeling, cloud-based modeling, schema and view modeling, languages and models, NoSQL modeling, conceptual modeling for machine learning and reasoning, applications of conceptual modeling.

Sensory Nerves Sep 14 2021 The intention of this book is to provide a comprehensive and contemporary review of the biology of sensory nerves. The book is unique, as it comprehensively covers the role of sensory nerves across many therapeutic areas.

**Cardiac Markers** Jun 23 2022 Cardiac Markers is a comprehensive, up-to-date summary of clinical information on serum cardiac markers for coronary artery disease. This book reviews in detail the biochemistry, clinical significance, and analytical measurements for each marker, as well as the advantages and limitations of existing and proposed markers. Comprehensive descriptions of therapeutic approaches to manage patients are presented. Also included are up-to-date listings of primary references and commercial methodologies, the latest data on the pathophysiology of unstable angina, and a discussion of the new emergency-room chest pain centers. Anyone who needs to know how to examine, diagnose, treat, and manage patients with acute chest pain and heart attacks will find this book indispensable.

Hidden in Plain Sight Jul 20 2019 Companies must innovate to grow, but they often forget to look beyond their own brands. Take Sony, for example. Its success with consumer innovations like the Walkman blinded it to obvious changes in how, when, and where people wanted their music. Apple capitalized on those changes in demand with the iPod, providing a new way of listening to music and of managing one's entire music library. This book explains how you can spot these opportunities that are hidden in plain sight. It introduces the demand-first innovation and growth model that will show you how to become an unbiased observer of people's consumption and usage behaviors. Refining this skill helps companies generate organic growth through new products, services, solutions, and experiences that truly enhance peoples' lives. Revealing the innovative processes of such organizations as BMW, Proctor and Gamble, GE Healthcare, and Frito-Lay, Hidden in Plain Sight offers you a new approach to identifying and executing your company's growth strategy.

Precast Concrete Structures Jun 18 2019 This second edition of Precast Concrete Structures introduces the conceptual design ideas for the prefabrication of concrete structures and presents a number of worked examples that translate designs from BS 8110 to Eurocode EC2, before going into the detail of the design, manufacture, and construction of precast concrete multi-storey buildings. Detailed structural analysis of precast concrete and its use is provided and some details are presented of recent precast skeletal frames of up to forty storeys. The theory is supported by numerous worked examples to Eurocodes and European Product Standards for precast reinforced and prestressed concrete elements, composite construction, joints and connections and frame stability, together with extensive specifications for precast concrete structures. The book is extensively illustrated with over 500 photographs and line drawings.

**Statistical Learning and Data Sciences** Mar 08 2021 This book constitutes the refereed proceedings of the Third International Symposium on Statistical Learning and Data Sciences, SLDS 2015, held in Egham, Surrey, UK, April 2015. The 36 revised full papers presented together with 2 invited papers were carefully reviewed and selected from 59 submissions. The papers are organized in topical sections on statistical learning and its applications, conformal prediction and its applications, new frontiers in data analysis for nuclear fusion, and geometric data analysis.

**LIMIT STATE DESIGN OF REINFORCED CONCRETE** Aug 01 2020 This substantially revised second edition takes into account the provisions of the revised Indian Code of practice for Plain and Reinforced Concrete IS 456 : 2000. It also provides additional data on detailing of steel to make the book more useful to practicing engineers. The chapter on Limit State of Durability for Environment has been completely revised and the new provisions of the code such as those for design for shear in reinforced concrete, rules for shearing main steel in slabs, lateral steel in columns, and stirrups in beams have been explained in detail in the new edition. This comprehensive and systematically organized book is intended for undergraduate students of Civil Engineering, covering the first course on Reinforced Concrete Design and as a reference for the practicing engineers. Besides covering IS 456 : 2000, the book also deals with the British and US Codes. Advanced topics of IS 456 : 2000 have been discussed in the companion volume Advanced Reinforced Concrete Design (also published by Prentice-Hall of India). The two books together cover all the topics in IS 456 : 2000 and many other topics which are so important in modern methods of design of reinforced concrete.

**Tietz Clinical Guide to Laboratory Tests - E-Book** Jan 18 2022 This new edition of Norbert Tietz's classic handbook presents information on common tests as well as rare and highly specialized tests and procedures - including a summary of the utility and merit of each test. Biological variables that may affect test results are discussed, and a focus is placed on reference ranges, diagnostic information, clinical interpretation of laboratory data, interferences, and specimen types. New and updated content has been added in all areas, with over 100 new tests added. Tests are divided into 8 main sections and arranged alphabetically. Each test includes necessary information such as test name (or disorder) and method, specimens and special requirements, reference ranges, chemical interferences and in vivo effects, kinetic values, diagnostic information, factors influencing drug disposition, and clinical comments and remarks. The most current and relevant tests are included; outdated tests have been eliminated. Test index (with extensive cross references) and disease index provide the reader with an easy way to find necessary information. Four new sections in key areas (Preanalytical, Flow Cytometry, Pharmacogenomics, and Allergy) make this edition current and useful. New editor Alan Wu, who specializes in Clinical Chemistry and Toxicology, brings a wealth of experience and expertise to this edition. The Molecular Diagnostics section has been greatly expanded due to the increased prevalence of new molecular techniques being used in laboratories. References are now found after each test, rather than at the end of each section, for easier access.

**Second-Language Speech** Mar 20 2022 Language acquisition is a human endeavor par excellence. As children, all human beings learn to understand and speak at least one language: their mother tongue. It is a process that seems to take place without any obvious effort. Second language learning, particularly among adults, causes more difficulty. The purpose of this series is to compile a collection of high-quality monographs on language acquisition. The series serves the needs of everyone who wants to know more about the problem of language acquisition in general and/or about language acquisition in specific contexts.
