[The Answer Machine](#) Apr 29 2020 *The Answer Machine is a practical, non-technical guide to the technologies behind information seeking and analysis. It introduces search and content analytics to software buyers, knowledge managers, and searchers who want to understand and design effective online environments. The book describes how search evolved from an expert-only to an end user tool. It provides an overview of search engines, categorization and clustering, natural language processing, content analytics, and visualization technologies. Detailed profiles for Web search, eCommerce search, eDiscovery, and enterprise search contrast the types of users, uses, tasks, technologies, and interaction designs for each. These variables shape each application, although the underlying technologies are the same. Types of information tasks and the trade-offs between precision and recall, time, volume and precision, and privacy vs. personalization are discussed within this context. The book examines trends toward convenient, context-aware computing, big data and analytics technologies, conversational systems, and answer machines. The Answer Machine explores IBM Watson's DeepQA technology and describes how it is used to answer health care and Jeopardy questions. The book concludes by discussing the implications of these advances: how they will change the way we run our businesses, practice medicine, govern, or conduct our lives in the digital age. Table of Contents: Introduction / The Query Process and Barriers to Finding Information Online / Online Search: An Evolution / Search and Discovery Technologies: An Overview / Information Access: A Spectrum of Needs and Uses / Future Tense: The Next Era in Information Access and Discovery / Answer Machines*

Profile of a Religious Man Mar 29 2020 *This book is a "journey book." Sitting down at a computer and producing the story has been a grand trek. I have learned that there is a principle in nature that some things need to mellow, calm down, and soak in. The refusal of winemakers to take a wine before its time is a notion I am coming to understand. It works with writers as well. Like a fens signaling its mother that it is time to head for the hospital, a literary work stays in the mind until its time. In my education, I have read of the battles of great Church leaders who were eventually thrown out of their churches. In my denominational education, I was largely led to see them as heretics, rebels, eccentrics, revolutionaries, apostates, and as generally representing a lower form of spirituality. Church education often asked me to surrender my biases in favor of accepting a new set of assumptions—my denominational ones. We were to be critical of everything except our organization. I submit that there is danger in that. This book will cover incidents from the first forty years of my life as a religious addict. You may find something here that you can identify with.*

[Neutral Accent](#) Nov 17 2021 *In Neutral Accent, A. Aneesh employs India's call centers as useful sites for studying global change. The horizon of global economic shift, the consequences of global integration, and the ways in which call center work "neutralizes" racial, ethnic, and national identities become visible from the confines of their cubicles. In his interviews with call service workers and in his own work in a call center in the high tech metropolis of Gurgaon, India, Aneesh observed the difficulties these workers face in bridging cultures, laws, and economies: having to speak in an accent that does not betray their ethnicity, location, or social background; learning foreign social norms; and working graveyard shifts to accommodate international customers. Call center work is cast as independent of place, space, and time, and its neutrality—which Aneesh defines as indifference to difference—has become normal business practice in a global economy. The work of call center employees in the globally integrated marketplace comes at a cost, however, as they become disconnected from the local interactions and personal relationships that make their lives anything but neutral.*

You Are the Needle and I Am the Thread Jul 21 2019 *Part memoir, part faith journey—these stories in You Are the Needle and I Am the Thread span twenty-five years of a Foreign Service family's life as they live and work in Pakistan, Egypt, Bangladesh, and Indonesia, as well as Washington, DC. They detail the joys and challenges of raising children overseas, the fears preceding the outbreak of the Gulf War and evacuation, and the frustrations of separation when Pamela's husband is sent to Afghanistan. You Are the Needle and I Am the Thread chronicles Pamela and her husband's journey as they seek to follow God's will, from their early decision to join the United States Agency for International Development to retirement and beyond. The stories, many of which were published in *The Foreign Service Journal*, recount the serendipity of life in the developing world. Walk in the footsteps of Moses, Alexander the Great, and Genghis Khan; explore bazaars like the Khan el Khalili in Cairo; trail tigers in the Sundarbans in Bangladesh; and stumble over cultural pitfalls while interacting with the locals and conducting business where life is anything but normal. Experience the heartbreak of end-of-life issues with elderly parents and the anguish of their sons' medical emergencies. Discover, like Pamela, that home is where the United States Government sends you.*

Intelligent Agents for Telecommunications Applications Oct 16 2021 *Intelligent agent and distributed AI (DAI) approaches attach specific conditions to cooperative exchanges between intelligent systems, that go far beyond simple functional interoperability.*

Ideally, systems that pursue local or global goals, coordinate their actions, share knowledge, and resolve conflicts during their interactions within groups of similar or dissimilar agents can be viewed as cooperative course-grained systems. The infrastructure of telecommunications is a world in transition. There are a number of trends that contribute to this: convergence of traditional telephony and data network works, blurring of boundaries between public and private networks, complementary evolution of wireline,

wireless, and cable network infrastructures, the emergence of integrated broadband multimedia networks and, of course, the information superhighway. Up to now, despite the effort that has gone into this area, the field of intelligent agents research has not yet led to many fielded systems. Telecommunications applications pose strong requirements to agents such as: reliability, real-time performance, openness, security management and other integrated management, and mobility. In order to fulfil their promise, intelligent agents need to be fully dependable and typically require an integrated set of capabilities. This is the challenge that exists for intelligent agents technology in this application domain.
