***Don't Tell Mum I Work on the Rigs...She Thinks I'm a Piano Player in a Whorehouse* May 23 2022 'Great two-fisted writing from the far side of hell.' - John Birmingham, bestselling author of He Died with a Felafel in his Hand 'A unique look at a gritty game. Relentlessly funny and obsessively readable.' - Phillip Noyce, director of The Quiet American and Clear and Present Danger Paul Carter has been shot at, hijacked and held hostage. He's almost died of dysentery in Asia and toothache in Russia, watched a Texan lose his mind in the jungles of Asia, lost a lot of money backing a mouse against a scorpion in a fight to the death, and been served cocktails by an orang-utan on an ocean freighter. And that's just his day job. Taking postings in some of the world's wildest and most remote regions, not to mention some of the roughest oil rigs on the planet, Paul has worked, gotten into trouble and been given serious talkings to in locations as far-flung as the North Sea, Middle East, Borneo and Tunisia, as exotic as Sumatera, Vietnam and Thailand, and as flat out dangerous as Columbia, Nigeria and Russia, with some of the maddest, baddest and strangest people you could ever hope not to meet. Strap yourself in for an exhilarating, crazed, sometimes terrifying, usually bloody funny ride through one man's adventures in the oil trade. When not getting into trouble on the rigs Paul lives a quiet life in Sydney.**

**Ephialtes The Codices** Apr 29 2020 The Ephialtes Trilogy chronicles the conflict between Earth and Mars, triggered by Mars' secession from the USAN in the aftermath of World War IV. Ephialtes The Codices makes up the connective tissue between books one and two of the trilogy. The collection comprises all four previously released codices together with the exclusive Ephialtes Codex V: Why Am I So Clever? Why Am I So Clever? Dr Daniel Kostovich, head of R&D at Venkdt Mars Corp and Special Adviser to the MSS, has always been a smart cookie. When he starts speculating on the provenance of his abilities he finds more questions than answers. As various possible solutions come and go Kostovich works on the pressing issues facing Mars - food production, defence equipment, and the unresolved conflict with the USAN. Is the ultimate answer to his question unknowable and, given the storm clouds gathering on the horizon, shouldn't his

undivided attention be elsewhere? **Be All You Can Be** When MSS Officer Kristen Stahl is seriously injured in the Battle of Allentown Spaceport the stability of her old life is thrown upside down. Along with her injuries she has to cope with a failing relationship and the possibility there is no longer a place for her in her beloved Martian Security Service. An uncertain future awaits all of Mars, but it seems the fates are determined to test Officer Stahl to the very limit of her capability. Can she fight her way back to where she needs to be, or is the simple act of survival victory enough? **Son of New York** The USAN isn't the place it used to be. The Martian deuterium embargo is causing huge economic damage, and the public is restive. Student Adam Wilson believes in his country but is reluctant to voice his feelings in light of the burgeoning protest movement's belligerent attitude. Following his own brush with authority Adam has to reassess his beliefs. Could it be that their once great president has stepped over the line? With a huge schism looming Adam is going to have to pick a side, but in a world filled with uncertainty it will be no easy choice. **A Cold Wind Blows** The huge biodomes in southwest Marineris supply Mars with food. Landing a job there is a dream come true for Kimberly Gooding, whose ultimate goal is to save enough money to emigrate to Earth. When she's called on to do some work outside the domes an urban legend about the ghost of a dead commander gives her pause. The conflict between her rational mind and some baser instincts takes centre stage, and her trust in her workmates is called into question. Is the problem lurking somewhere outside the domes or is it buried deep in Kimberly's subconscious? **See the Worlds** Joining the army is simply a way out for a young person from the backwaters of the USAN, and landing a plumb posting at the garrison on Mars seems to be the icing on the cake. However, the trip of a lifetime coincides with the Martian bid for independence. As the cushy posting turns into something far more harrowing our narrator reflects on the events that took him to Mars and casts a fearful eye on what the future might hold. **The Ephialtes** codices look back to the first book of the trilogy and forward to the second, exploring characters and events from each in new and unexpected ways. Does the ghost of a lost commander really roam the Martian outlands? How would it feel to be a patriotic young American coming to realise it may be necessary to reassess your values? As a trooper injured in the episode depicted at the close of *Ephialtes*, how would you cope with your rehabilitation? Just why is Kostovich so damned clever?

***Dancing the Death Drill*** May 11 2021 'Be quiet and be calm, my countrymen, for what is taking place is exactly what you came to do ... Brothers, we are drilling the death drill.' - Reverend Isaac Wauchope Dyobha Paris, 1958. A skirmish in a world-famous restaurant leaves two men dead and the restaurant staff baffled. Why did the head waiter, a man who's been living in France for many years, lunge at his patrons with a knife? As the man awaits trial, a journalist hounds his long-time friend, hoping to expose the true story behind this unprecedented act of violence. Gradually, the extraordinary story of Pitso Motaung, a young South African who volunteered to serve with the Allies in the First World War, emerges. Through a tragic twist of fate, Pitso found himself on board the *ss Mendi*, a ship that sank off the Isle of Wight in February 1917. More than six hundred of his countrymen, mostly black soldiers, lost their lives in a catastrophe that official history largely forgot. One particularly cruel moment from that day will remain etched in

Pitso's mind, resurfacing decades later to devastating effect. *Dancing the Death Drill* recounts the life of Pitso Motaung. It is a personal and political tale that spans continents and generations, moving from the battlefields of the Boer War to the front lines in France and beyond. With a captivating blend of pathos and humour, Fred Khumalo brings to life a historical event, honouring both those who perished in the disaster and those who survived.

*Heat and Light* Jun 19 2019 Acclaimed New York Times bestselling author Jennifer Haigh returns to the Pennsylvania town at the center of her iconic novel *Baker Towers* in this ambitious, achingly human story of modern America and the conflicting forces at its heart—a bold, moving drama of hope and desperation, greed and power, big business and small-town families. Forty years ago, Bakerton coal fueled the country. Then the mines closed, and the town wore away like a bar of soap. Now Bakerton has been granted a surprise third act: it sits squarely atop the Marcellus Shale, a massive deposit of natural gas. To drill or not to drill? Prison guard Rich Devlin leases his mineral rights to finance his dream of farming. He doesn't count on the truck traffic and nonstop noise, his brother's skepticism or the paranoia of his wife, Shelby, who insists the water smells strange and is poisoning their frail daughter. Meanwhile his neighbors, organic dairy farmers Mack and Rena, hold out against the drilling—until a passionate environmental activist disrupts their lives. Told through a cast of characters whose lives are increasingly bound by the opposing interests that underpin the national debate, *Heat and Light* depicts a community blessed and cursed by its natural resources. Soaring and ambitious, it zooms from drill rig to shareholders' meeting to the Three Mile Island nuclear reactor to the ruined landscape of the "strippings," haunting reminders of Pennsylvania's past energy booms. It is a fascinating seventeenth-century military manual, designed to instruct contemporary soldiers how to handle arms effectively, and correctly, and it makes for a unique glimpse into warfare as waged in the Thirty Years War and the English Civil War. The manual uses illustrations to clearly demonstrate drills for soldiers employing calivers and muskets. It shows how to load and fire, or merely carry, a matchlock piece. In addition detailed illustrations show the various movements and postures to be adopted during use of the pike. There are 117 illustrations contained in this book and all are fine examples of seventeenth-century art. Each image is detailed and evocative and students of military history and military costume are sure to find them of immense interest. **Lockdown Drills Mar 09 2021** A comprehensive resource on what lockdown drills are, why they are necessary, and how best to conduct them. The first book to offer a comprehensive examination of lockdown drills in K-12 schools, *Lockdown Drills* balances research findings with practical applications and implications. Schildkraut and Nickerson, school safety experts with complementary backgrounds in criminology and school psychology, review the historical precedents for lockdown drills, distinguish school lockdowns from other emergency procedures (such as active shooter drills), explain why they are conducted, present evidence-based research on their effectiveness, and describe how to conduct them according to best practices. Proponents of lockdown drills as a life-saving necessity, the authors help to bring much-needed standardization to how these drills are studied and conducted. The authors present common arguments for and against the inclusion of lockdown drills in emergency preparedness efforts, balancing their discussion of the perceptions and psychological impacts of lockdown drills with scholarly research on the extent to which lockdown drills improve how effectively individuals respond to a potential threat. Placing lockdown drills in the larger context of school safety and preparedness, they examine the broader implications for policymakers. Finally, they emphasize that drills, of which lockdowns are only one type, are just a part of the complex school safety puzzle. Ensuring that schools are safe places for students and educators begins long before a crisis occurs and continues through the days, weeks, and years of recovery following a crisis.

*The Frackers* Nov 24 2019 The Frackers by Gregory Zuckerman, bestselling author of *The Greatest Trade Ever*, tells the untold story of the tycoons behind the US fracking controversy. Things looked grim for American energy in 2006. Oil production was in steep decline and natural gas was hard to find. The Iraq War threatened the nation's already tenuous relations with the Middle East. China was rapidly industrializing and competing for resources. Major oil companies had just about given up on new discoveries on US soil, and a new energy crisis loomed. But a handful of men believed everything was about to change. By experimenting with hydraulic fracturing through extremely dense shale - a process now known as fracking - these 'wildcatters' started a revolution. In just a few years, they solved America's dependence on imported energy, triggered a global environmental controversy - and made and lost astonishing fortunes. The frackers have already transformed the economic, environmental, and geopolitical course of history, and like the Rockefellers and the Gettys before them, they're using their wealth and power to influence politics, education, entertainment, sports, and many other fields. Activists argue that the same methods that are creating so much new energy are also harming our water supply and threatening environmental chaos. Award-winning reporter Gregory Zuckerman gained exclusive access to the frackers, chronicling the untold story of how they transformed the nation and the world. The result is a dramatic narrative that stretches from the barren fields of North Dakota to the tense Wall Street boardrooms. *The Frackers* also tells the story of the angry opposition unleashed by this revolution, and explores just how dangerous fracking really is. Gregory Zuckerman is a special writer at *The Wall Street Journal* and the bestselling author of *The Greatest Trade Ever*. He is a two-time winner of the Gerald Loeb Award and a winner of the New York Press Club Journalism Award.
