The economics of teff: Exploring Ethiopia's biggest cash crop Jun 23 2022 Considerable poverty and food insecurity in Ethiopia, combined with the overwhelming majority of Ethiopians who depend on agriculture for their livelihoods, make agricultural transformation a crucial development goal for the country. One promising improvement is to increase production of teff, the calorie- and nutrient-rich but low-yielding staple. The Economics of Teff: Exploring Ethiopia's Biggest Cash Crop examines key aspects of teff production, marketing, and consumption, with a focus on opportunities for and challenges to further growth. The authors identify ways to realize teff's potential, including improving productivity and resilience, selecting and scaling up new technologies, establishing distribution systems adapted to different areas' needs, managing labor demand and postharvest operations, and increasing access to larger and more diverse markets. The book's analysis and policy conclusions should be useful to policy makers, researchers, and others concerned with Ethiopia's economic development.

The Last Vispo Anthology May 30 2020 This book collects experimental “visual poetry.” With The Last Vispo Anthology, Fantagraphics spotlights the intersection of art and language in this innovative new collection ? without peer in English ? that gathers the work of visual poets from around the world into one stunning volume. The alphabet is turned on its head and inside-out and the results culminate in a compilation of daring and surprising verbo-visual gems. The Last Vispo is composed of visual poetry (a portmanteau of the words “visual” and “poetry”) from the years 1998 to 2008, during a burst of creative activity fueled by file sharing and e-mail, which made it possible for the vispo community to establish a more heightened and sophisticated dialogue with one another. The collection extends the dialectic between art and literature that began with ancient “shaped text,” medieval pattern poetry, and dada typography, pushing past the concrete poetics of the 1950s and the subsequent mail art movement of the 1980s to its current incarnation. Rather than settle into predictable, unchallenged patterns, this vibrant poetry seizes new tools to expand the body of work that inhabits the borderlands of visual art and poetic language. The Last Vispo features 148 contributors from 23 countries on five continents. It includes 12 essays that illuminate the abundant history and the state of vispo today. The anthology offers a broad amalgam of long-time practitioners and poets new to visual poetry over the last decade, underscoring the longevity and the continued vitality of the art form.

Canonical Theism Aug 13 2021 Canonical Theism is a post-Protestant vision for the renewal of both theology and church. The editors call for the retrieval and redeployment of the full range of materials, persons, and practices that make up the canonical heritage of the church, including scripture, doctrine, sacred image, saints, sacraments, and more. The central thesis of the work is that the good and life-giving Holy Spirit has equipped the church with not only a canon of scripture but also with a rich canonical heritage of materials, persons, and practices. However, much of the latter has been ignored or cast aside. This unplumbed resource of canonical heritage waits for the church to rediscover its wealth. With a bold set of thirty theses, the authors chart and defend that mine of opportunity. They then invite the entire church to explore the benefits of their discoveries. This ambitious book offers insights to be integrated into the church body, renewing the faith that nourished converts, created saints, and upheld martyrs across the years.

Walker Evans Oct 03 2020 "As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his ether, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.

Scorch Oct 15 2021 In the future world of Scorch, America is run by a “corporacracy.” Three conglomerates have taken control not by force but by manipulating common beliefs and values through the media, and particularly by playing on Americans’ fears of Big Brother. Consumerism and privatization have run amok in this landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are run by big business. This is a darkly comic first novel of a dystopian future, with echoes of 1984 and Brave New World.

Extreme Economies Nov 16 2021 *Winner of the Enlightened Economist Prize 2019* *Winner of Debut Writer of the Year at the Edward Stanford Travel Writing Awards 2020* *Longlisted for the Financial Times & McKinsey Business Book of the Year Award 2019* 'Extreme Economies is a revelation - and a must-read.' Andy Haldane, Chief Economist at the Bank of England To understand how humans react and adapt to economic change we need to study people who live in harsh environments. From death-row prisoners trading in institutions where money is banned to flourishing entrepreneurs in the world's largest refugee camp, from the unrealised potential of cities like Kinshasa to the hyper-modern economy of Estonia, every life in this book has been hit by a seismic shock, violently broken or changed in some way. In his quest for a purer view of how economies succeed and fail, Richard Davies takes the reader off the beaten path to places where part of the economy has been repressed, removed, destroyed or turbocharged. He tells the personal stories of humans living in these extreme situations, and of the financial infrastructure they create. Far from the familiar stock reports, housing crises, or banking scandals of the financial pages, Extreme Economies reveals the importance of human and social capital, and in so doing tells small stories that shed light on today's biggest economic questions. 'A highly original approach to understanding what really makes economies tick.' Mervyn King, former Governor of the Bank of England

It especially helps to get details of services in less time; wherever the user may be and whenever they want. The need for smartphones and location enabled applications has been growing year after year. Nowadays no one can leave without their phone; the phone seemingly becomes one of the parts of the human body. The individual can now be predicted by their phone and the identity of the phone becomes the person's identity. Though there is a tremendous need for location-enabled applications with smartphones, the debate on privacy and security related to location data has also been growing. Privacy and Security Challenges in Location Aware Computing provides the latest research on privacy enhanced location-based applications development and exposes the necessity of location privacy preservation, as well as issues and challenges related to protecting the location data. It also suggests solutions for enhancing the protection of location privacy and therefore users' privacy as well. The chapters highlight important topic areas such as video surveillance in human tracking/detection, geographical information system design, cyberspace attacks and warfare, and location aware security systems. The culmination of these topics creates a book that is ideal for security analysts, mobile application developers, practitioners, academicians, students, and researchers.
