Options for Minimizing Fuel-Related Contaminants in Lakes and Reservoirs Jun 19 2019

The primary objective of the report was to provide reservoir managers with technical and

economic information regarding the possible methods for controlling the levels of MTBE and BTEX in reservoir water supplies. This report comprehensively evaluates options to give practical data and advice to water managers who wish to consider the benefits of dual use (use to store drinking water supplies and use as recreational attractions) without introducing unacceptable health risks into the water bodies being managed.
