Religion, Power, and the Rise of Shinto in Early Modern Japan Jan 29 2020

This book sheds new light on the relationship between religion and state in early modern Japan, and demonstrates the growing awareness of Shinto in both the political and the intellectual elite of Tokugawa Japan, even though Buddhism remained the privileged means of stately religious control. The first part analyses how the Tokugawa government aimed to control the populace via Buddhism and at the same time submitted Buddhism to the sacralization of the Tokugawa dynasty. The second part focuses on the religious protests throughout the entire period, with chapters on the suppression of Christians, heterodox Buddhist sects, and unwanted folk practitioners. The third part tackles the question of why early Tokugawa Confucianism was particularly interested in “Shinto” as an alternative to Buddhism and what “Shinto” actually meant from a Confucian stance. The final part of the book explores attempts to curtail the institutional power of Buddhism by reforming Shinto shrines, an important step in the so called “Shintoization of shrines” including the development of a self-contained Shinto clergy.

Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1892 edition. Excerpt: ... CHAPTER X. Elizabeth, as they drove along, watched for the first appearance of Pemberley Woods with some perturbation; and when at length they turned in at the lodge, her spirits were in a high flutter. The park was very large, and contained great variety of ground. They entered it in one of its lowest points, and drove for some time through a beautiful wood stretching over a wide extent. Elizabeth's mind was too full for conversation, but she saw and admired every remarkable spot and point of view. They gradually ascended for half a mile, and then found themselves at the top of a considerable eminence, where the wood ceased, and the eye was

instantly caught by Pemberley House, situated on the opposite side of the valley, into which the road with some abruptness wound. It was a large, handsome stone building, standing well on rising ground, and backed by a ridge of high woody hills; and in front a stream of some natural importance was swelled into greater, but without any artificial appearance. Its banks were neither formal nor falsely adorned. Elizabeth was delighted. She had never seen a place for which VOL. II. -- 6 Nature had done more, or where natural beauty had been so little counteracted by an awkward taste. They were all of them warm in their admiration; and at that moment she felt that to be mistress of Pemberley might be something! They descended the hill, crossed the bridge, and drove to the door; and while examining the nearer aspect of the house, all her apprehension of meeting its owner returned. She dreaded lest the chambermaid had been mistaken. On applying to see the place, they were admitted into the hall; and Elizabeth, as they waited for the housekeeper, had leisure to wonder at her being where she was. The...

The World Politics of Social Investment: Volume II Mar 01 2020 Welfare states around the globe are changing, challenged by the development of knowledge economies. In many countries, policy-makers' main response has been to modernize welfare states by focusing on future-oriented social investment policies that focus on creating, mobilizing, and preserving human skills and capabilities. Yet, there is massive variance in the development of social investment strategies. *The World Politics of Social Investment: Political Dynamics of Reform* is the second of two volumes of the World Politics of Social Investment (WOPSI) project, which systematically maps and explains different welfare reform strategies in democratic countries around the world. This volume traces the development of social investment reforms across the regions of Nordic, Continental, and Southern Europe, as well as Central and Eastern Europe, North and Latin America, and North East Asia. The chapters in this volume study the impact of different structural drivers for social investment (e.g., demographic, poverty, demand for skill, or lack of an available workforce), the salience of social investment in the public debates, and the different political coalitions that led to or prevented the adoption of social investment strategies. The chapters are written by leading social policy

scholars from different world regions. They all apply a joint theoretical framework (developed in the first of the two volumes) to explain the politics of social investment in a range of contexts and policy fields. Jointly with the first volume, the WOPSI project offers the first worldwide analysis of social investment reforms around the globe.
