Problem-Based Learning for Math & Science Jan 31 2020 This title provides teachers with the tools they need to help students learn in an integrated, real-world instructional environment.

Journal Keeping Oct 02 2022 \*\* By the authors of the acclaimed *Introduction to Rubrics* \*\* Major growth of interest in keeping journals or diaries for personal reflection and growth; and as a teaching tool \*\* Will appeal to college faculty, administrators and teachers One of the most powerful ways to learn, reflect and make sense of our lives is through journal keeping. This book presents the potential uses and benefits of journals for personal and professional development—particularly for those in academic life; and demonstrates journals' potential to foster college students' learning, fluency and voice, and creative thinking. In professional life, a journal helps to organize, prioritize and address the many expectations of a faculty member's or administrator's roles. Journals are effective for developing time management skills, building problem-solving skills, fostering insight, and decreasing stress. Both writing and rereading journal entries allow the journal keeper to document thinking; to track changes and review observations; and to examine assumptions and so gain fresh perspectives and insights over past events. The authors present the background to help readers make an informed decision about the value of journals and to determine whether journals will fit appropriately with their teaching objectives or help manage their personal and professional lives. They offer insights and advice on selecting the format or formats and techniques most appropriate for the reader's purposes.

Designing and Using Rubrics for Reading and Language Arts, K-6 Aug 20 2021 Designing and Using Rubrics for Reading and Language Arts provides teachers with a step-by-step guide to creating and using rubrics to meet students' needs. This comprehensive resource offers an overview of rubrics as an teaching tool, directions for creating rubrics, and over 40 examples of rubrics that cover key language processes and skills at the primary and middle school levels. The author also includes suggestions for introducing the rubrics to students, making assignments, and using the rubrics to assess student understanding. This revised edition presents expanded coverage of the process of developing rubrics, and features several new rubrics that address narrative writing, persuasive writing, comprehension monitoring, the use of presentation software, and information literacy skills.

Assessment Rubrics Decoded Jul 19 2021 Rubrics offer concrete artefacts of what schools evaluate to be of merit, and what educators and schools value to be worth rewarding. *Assessment Rubrics Decoded* offers insights into a myriad of issues that affect, and are affected by, the construction of merit in students' learning and the articulation of (underlying) educational ideologies in the assessment of student achievement. Designed for both students and teachers - who should have parity of involvement in developing and using rubrics - this book covers the problematic issues of assessment in schools while offering readers practical solutions to navigating the ensuing tensions and dilemmas. The notion that rubrics may hinder assessment transparency is also discussed, with examples, to warn against uncritical use of rubrics that may discipline rather than help learners. The perspective of a school leader in providing assessment leadership to rubrics usage across a school is included for extending awareness of rubrics beyond classroom contexts. This provides an informed approach for teachers to understand the stakes and complexities involved in judging learning, and learners, whilst offering concrete options and suggestions to consider. This book will be a valuable resource for classroom teachers, school leaders, teacher educators and researchers interested in the field of assessment rubrics.

Assessing EFL Writing in the 21st Century Arab World Jun 25 2019 This book empirically explores assessment of EFL (English as a Foreign Language) writing in different Arab world contexts at the university level, which often presents a

challenge for teachers and students alike. Analysing a number of different practices throughout the chapters including peer assessment, self-assessment, e-rubrics and writing coherence, the authors highlight different issues and challenges that affect the assessment of EFL writing in the Arab world, and provide valuable insights into how it can be improved. This book is sure to become an important practical resource for practitioners, researchers, professors and graduate students working on EFL writing in this region.

**A Writer's Notebook Sep 01 2022** Tap into your inner writer with this book of practical advice by the bestselling author of *How Writers Work* and the ALA Notable Book *Fig Pudding*. This middle grade book is an excellent choice for tween readers in grades 5 to 6, especially during homeschooling. It's a fun way to keep your child entertained and engaged while not in the classroom. Writers are just like everyone else—except for one big difference. Most people go through life experiencing daily thoughts and feelings, noticing and observing the world around them. But writers record these thoughts and observations. They react. And they need a special place to record those reactions. Perfect for classrooms, *A Writer's Notebook* gives budding writers a place to keep track of all the little things they notice every day. Young writers will love these useful tips for how to use notes and jottings to create stories and poems of their own.

**Assessment in the Mathematics Classroom Apr 15 2021** The third in the series of yearbooks by the Association of Mathematics Educators in Singapore, *Assessment in the Mathematics Classroom* is unique as it addresses a focused theme on mathematics education. The objective is to encourage teachers and researchers to include assessment of non-cognitive attributes and to use techniques in addition to paper-and-pencil tests that focus on typical problems. Several renowned international researchers in the field have published their work in the book. The thirteen chapters of the book illustrate evidence-based practices that school teachers and researchers can experiment in their lessons to bring about meaningful learning outcomes. A recurring theme in most chapters is the widely circulated notions of formative assessment and assessment for learning. The book makes a significant contribution towards assessment in mathematics. It is a good resource for research students and a must-read mathematics educators. Contents: Introduction: Assessment Matters (Khoon Yoong Wong & Berinderjeet Kaur) Using a Multi-Dimensional Approach to Understanding to Assess Students' Mathematical Knowledge (Denisse R Thompson & Berinderjeet Kaur) Assessing Problem Solving in the Mathematics Curriculum: A New Approach (Tin Lam Toh, Khiok Seng Quek, Yew Hoong Leong, Jaguthsing Dindyal & Eng Guan Tay) Assessing Conceptual Understanding in Mathematics with Concept Mapping (Haiyue Jin & Khoon Yoong Wong) Using Journal Writing to Empower Learning (Berinderjeet Kaur & Chun Ming Eric Chan) Implementing Alternative Assessment in the Lower Primary Mathematics Classroom (Kai Kow Joseph Ye) Open-Ended Tasks and Assessment: The Nettle or the Rose (David J Clarke) Using ICT to Improve Assessment (Marja van den Heuvel-Panhuizen, Angeliki Kolovou & Marjolijn Peltenburg) The Assessment for, of and as Learning in Mathematics: The Application of SLOA (Mo Ching Magdalena Mok) Building Bridges Between Large-Scale External Assessment and Mathematics Classrooms: A Japanese Perspective (Yoshinori Shimizu) Errors in Mathematics Assessment Items Written by Pre-Service Teachers (Jaguthsing Dindyal) Affective Assessment in the Mathematics Classroom: A Quick Start (Eng Guan Tay, Khiok Seng Quek & Tin Lam Toh) Implementing Self-Assessment to Develop Reflective Teaching and Learning in Mathematics (Lianghuo Fan) Readership: Mathematics educators, research students and mathematics teachers. Keywords: Mathematics; Assessment of Learning; Assessment as Learning; Assessment for Learning; Cognitive Domain; Affective Domain; Alternative Assessment

**Introduction to Rubrics Jan 13 2021** "This wonderfully compact introduction to rubrics will serve higher education teachers well [and] when departments or groups of faculty use rubrics as described in this book, they will indeed achieve the 'academic currency' sought today in higher education." -- Amy Driscoll, director of Teaching, Learning and Assessment CSU, Monterey Bay. You need rubrics if: \* You find yourself repeating the same comments on most student papers \* You worry that you're grading the latest papers differently from the first \* You're concerned about communicating the complexity of a semester-long assignment \* You question the consistency of your and your colleagues' grading scales \* Grading is taking up far too much of your valuable time Research shows that rubrics save professors' time while conveying meaningful and timely feedback for students, and promoting self-regulated and independent learning. The reason rubrics are little used in higher education is that few faculty members have been exposed to their use. At its most basic a rubric is a scoring tool that divides an assignment into its component parts and objectives, and provides a detailed description of what constitutes acceptable and unacceptable levels of performance for each part. Rubrics can be used to grade any assignment or task: research papers, book reviews, participation in discussions, laboratory work, portfolios, oral presentations, group work, and more. This book defines what rubrics are, and how to construct and use them. It provides a complete introduction for anyone starting out to integrate rubrics in their teaching. The authors go on to describe a variety of processes to construct rubrics, including some which involve student participation. They demonstrate how interactive rubrics -- a process involving assessors and the assessed in defining the criteria for an assignment or objective -- can be effective, not only in involving students more actively in their learning, but in establishing consistent standards of assessment at the program, department and campus level. "A valuable resource for the new user in a content discipline and belongs in every faculty developer's library." -- Edward Nuhfer, Director, Center for Teaching and Learning, Idaho State University

**From Principles of Learning to Strategies for Instruction-with Workbook Companion Jul 27 2019** In this workbook companion, we expand on the strategies presented in the book by supplying need-based practical and specific strategies for implementation of a variety of other subject matters. The book provides contributions from a mix of teacher educators and practitioners. We focus on a specific targeted group, high school age adolescents. Our targeted readers are new and experienced teachers developing curricula for this group.

**A Collection of Performance Tasks and Rubrics Nov 03 2022** First Published in 2001. Routledge is an imprint of Taylor & Francis, an informa company.

**Improving Writing and Thinking Through Assessment Apr 27 2022** Improving Writing and Thinking through Assessment is

designed to help individual faculty and administrators select assessment approaches and measures to maximize their students' writing and thinking. The book offers useful guidance, through presentation of recommended assessment guidelines and measurement principles in Part 1 and applications from a variety of contributors in Part 2. It addresses a wide range of audiences, including instructors who want to assess and thus foster writing and thinking in their courses, administrators and instructors planning to assess writing and thinking at the program or institutional level, and graduate students interested in improving students' writing and critical thinking. This book is more guide than a "cookbook." By providing comprehensive standards and criteria that help individuals or teams develop plans and measures to improve writing and thinking, the book should be helpful for academic and Student Affairs administrators and faculty - as the principles apply equally to all engaged in assessment. Contributors, representing a wide range of educators, illustrate many of the approaches and methods described in the theoretical section of the book using a variety of assessment strategies at both classroom and program levels. Readers will see how different types of institutions, both private and public as well as undergraduate and graduate, have designed assessment strategies and plans to gauge and enhance writing and thinking growth in the classroom and across programs. They candidly describe challenges encountered and solutions they adopted or suggest. These chapters reflect approaches and perspectives from various discourse communities - including writing program administrators, composition faculty, assessment professionals, and individual faculty representing several disciplines. The author argues the urgent need to develop strong writers and thinkers. She discusses challenges and obstacles, but underscores the necessity for more faculty involvement and institutional commitment. This book will help institutions and individual faculty design and implement sound, meaningful assessment strategies to foster effective writing and thinking that will both advance the goals of the institutional mission and meet faculty's disciplinary objectives and scholarly concerns.

**Imaginative Teaching through Creative Writing** Feb 23 2022 Growing out of recent pedagogical developments in creative writing studies and perceived barriers to teaching the subject in secondary education schools, this book creates conversations between secondary and post-secondary teachers aimed at introducing and improving creative writing instruction in teaching curricula for young people. Challenging assumptions and lore regarding the teaching of creative writing, this book examines new and engaging techniques for infusing creative writing into all types of language arts instruction, offering inclusive and pedagogically sound alternatives that consider the needs of a diverse range of students. With careful attention given to creative writing within current standards-based educational systems, *Imaginative Teaching Through Creative Writing* confronts and offers solutions to the perceived difficulty of teaching the subject in such environments. Divided into two sections, section one sees post-secondary instructors address pedagogical techniques and concerns such as workshop, revision, and assessment before section two explores hands-on activities and practical approaches to instruction. Focusing on an invaluable and underrepresented area of creative writing studies, this book begins a much-needed conversation about the future of creative writing instruction at all levels and the benefits of collaboration across the secondary/post-secondary divide.

**Embracing Mathematics** Nov 10 2020 This alternative textbook for courses on teaching mathematics asks teachers and prospective teachers to reflect on their relationships with mathematics and how these relationships influence their teaching and the experiences of their students. Applicable to all levels of schooling, the book covers basic topics such as planning and assessment, classroom management, and organization of classroom experiences; it also introduces some novel approaches to teaching mathematics, such as psychoanalytic perspectives and post-modern conceptions of curriculum. Traditional methods-of-teaching issues are recast in a new discourse, provoking new ideas for making mathematics education meaningful to teachers as well as their students. Co-authored by a professor and coordinator of mathematics education programs, with illustrative contributions from practicing elementary, middle, and high school mathematics teachers, this book is a unique collaboration across all pre-college grades, making it ideal for teacher discussion groups at any level. *Embracing Mathematics: integrates pedagogy and content exploration in ways that are unique in mathematics education features textboxes with reflection questions and suggested explorations that can be easily utilized as homework for a course or as discussion opportunities for teacher reading groups offers examples of teachers' action research projects that grew out of their interactions with the main chapters in the book is not narrowly limited to mathematics education but incorporates curriculum studies - an invaluable asset that allows instructors to find more ways to engage students in self-reflexive acts of teaching* *Embracing Mathematics* is intended as a method text for undergraduate and master's-level mathematics education courses and more specialized graduate courses on mathematics education, and as a resource for teacher discussion groups.

**Fostering Global Citizenship Mar 03 2020** With awareness of both the opportunities and challenges presented by globalization, there is a growing trend among colleges and universities across the country to commit goals and resources to the concept of internationalizing their campuses. This can occur in a number of different ways but a common thread involves exploring the concept of global citizenship and finding ways to embed this concept in undergraduate curricula. For faculty, this may call for moving out of a presumed comfort zone in the traditional classroom and determining new approaches to teaching a generation of students who will live and work in a more global context. A method for accomplishing this work that is growing in popularity involves offering short-term, faculty-led field courses to international settings. In fact, today more college students are participating in such short-term study abroad opportunities than the more traditional semester and/or yearlong programs. Faculty and administrators who want to capitalize on short-term, study abroad programs as a means for internationalizing their campuses need practical resources to help them realize this challenging but important goal. They not only need support in developing the course curricula and logistics, but also in constructing authentic means for assessing the multi-faceted learning that occurs. Short-term international programs, when carefully planned and executed, engage the participants (both students and faculty) in unique learning experiences that can involve service, research, and critical analysis of what it truly means to be a global citizen. Such work helps define the somewhat nebulous but worthy goals of internationalizing campuses and fostering global citizenship. The authors of this text are professional educators with deep experience in global education and curriculum development. They offer a valuable resource for the development, execution and assessment of faculty-led international field courses that is at once theoretical, practical and motivational. Whether readers are considering offering an international field program for the first time and need guidance; are veteran field course leaders who would like to take their work to the next level; or are administrators attempting to encourage and provide needed support for faculty-led international programs, this book will prove invaluable.

The materials in this book are aligned with the English Language Arts Common Core Standards The website includes an ELA Common Core Tracking Sheet, a handy resource when writing or evaluating curriculum.

**Rubric Nation Mar 15 2021** What is a rubric and how are they being used in teacher education and evaluation? When did

rubrics become ubiquitous in the field of education? What impact do rubrics have on students, teachers, teacher educators, and the educational enterprise? This book is an edited volume of essays that critically examine the phenomenon of rubrics in teacher education, evaluation and education more broadly. Rubrics have seen a dramatic rise in use and presence over the past twenty-five years in colleges of education and districts across the country. Although there is a wealth of literature about how to make rubrics, there is scant literature that explores the strengths and weaknesses of rubrics and the impact the rubric phenomenon is having in reshaping education. The chapters included in this edited volume will critically reflect on the contemporary contexts of rubrics and the uses and impact of rubrics in education. Since rubrics have become indelible in education, it is necessary for a fuller, nuanced discussion of the phenomenon. Creating a book that explores these aspects of rubrics is timely and fundamental to expanding the discourse on this ubiquitous evaluation tool. This book is not meant to be a series of chapters dedicated to best practices for creating rubrics, nor is this text meant to present all sides of the rubric discussion. Rather, this text intends to offer critical polemics about rubrics that can spur greater critical discussion about a phenomenon in education that has largely been unquestioned in the literature.

**Leadership of Assessment, Inclusion, and Learning** Jan 01 2020 This book provides pragmatic strategies and models for student assessment and ameliorates the heightened sense of confusion that too many educators and leaders experience around the complexities associated with assessment. In particular, it offers guidance to school and district personnel charged with fair and appropriate assessment of students who represent a wide variety of abilities and cultures. Chapters focus on issues that directly impact the educational lives of teachers, students, parents, and caregivers. Importantly, the confluence of assessment practices and community expectations also are highlighted. Assessment is highly politicised in contemporary society and this book will both confirm and challenge readers' beliefs and practices. Indeed, discerning readers will understand that the chapters offer them a bridge from many established assessment paradigms to pragmatic, ethical solutions that align with current expectations for schools and districts. In Part One, readers engage with concepts and skills needed by school learning leaders to guide optimal assessment practices. Part Two delves into student assessment within and across disciplines. Part Three provides pragmatic approaches that address assessment in the context of inclusive intercultural education, pluralism, and globalisation.

**Multiple Intelligences and Instructional Technology** Aug 08 2020 In his first edition, popular writer and consultant Walter McKenzie showcased the natural fit between multiple intelligences theory and educational technology. The second edition builds on and extends this premise. **Introduction to Rubrics** Sep 08 2020 This new edition retains the appeal, clarity and practicality that made the first so successful, and continues to provide a fundamental introduction to the principles and purposes of rubrics, with guidance on how to construct them, use them to align course content to learning outcomes, and apply them in a wide variety of courses, and to all forms of assignment. Reflecting developments since publication of the first edition, the authors have extended coverage to include: \* Expanded discussion on use of rubrics for grading \* Grading on-line with rubrics \* Wider coverage of rubric types (e.g., holistic, rating scales) \* Rubric construction in student affairs \* Pros and cons of working with "ready-made" rubrics \* Using rubrics to improve your teaching, and for SoTL \* Use of rubrics in program assessment (case study) \* Application of rubrics in the arts, for study abroad, service learning and students' independent learning \* Up-dated literature review

**Collections of Performance Tasks & Rubrics** Jul 31 2022 This book features 68 performance tasks and rubrics, all designed to motivate and engage your students. Also included are samples of student work to help you apply the rubrics and develop your grading and scoring skills. The performance assessments in this book were contributed by teachers like you from all over the country and they include: - open-ended and extended response exercises - projects and portfolios - behavioral assessments (skits, debates, discussions, etc.) - authentic assessments - and student self-assessments, in addition to those administered by teachers.

**Science the "write" Way** Feb 11 2021 Writing skills are high on the list of real-world requirements for all students including science students. Every scientific discipline needs professionals who can ably communicate in writing. Scientists must be able to describe their proposed studies for funding considerations, track their observations and results in their own notes, describe their experimental protocols for their peers to replicate, and synthesize their work to the wider world community."

**Teaching Writing in the Content Areas** Mar 27 2022 Offers strategies and practical tools to integrate writing assignments into math, science, art, and social studies.
