package containing a digital voice recorder and a cryptic message from his brother. He follows the clues to New York City, and soon discovers that Coop has joined the Community, a self-sufficient society living beneath the streets. Now it's up to Pat to find his brother -- and bring him home.

EXCERPT: From BENEATH Exactly one year to the day after my brother, Coop, ditched me, I got a package in the mail. It came to the school, not our house. The secretary handed me the package with a warning that I was never to use the school as my personal address. I was going to tell her that I hadn't

when I saw my name: Pat Meatloaf O'Toole scrawled in Coop's familiar handwriting. Meatloaf is not my real middle name. I told her I would never do it again, grabbed the package, locked myself in a restroom stall, and tore the box open. Inside was a handheld digital voice recorder, a supply of memory sticks, and a note written on a greasy hamburger wrapper: "Lil Bro, Pat, just turn the recorder to Play, and I'll explain what you're supposed to do with this. DO NOT share with parents. This is just between you and me. Your big bro, Coop . . ." I made sure the restroom was

empty and switched on the recorder. Introduction to Digital Filters Feb 26 2020 A digital filter can be pictured as a "black box" that accepts a sequence of numbers and emits a new sequence of numbers. In digital audio signal processing applications, such number sequences usually represent sounds. For example, digital filters are used to implement graphic equalizers and

other digital audio effects. This book is a gentle introduction to digital filters, including mathematical theory, illustrative examples, some audio applications, and useful software starting points. The theory treatment begins at the high-school level, and covers fundamental concepts in linear systems theory and digital filter analysis. Various "small" digital filters are analyzed as examples, particularly those commonly used in audio applications. Matlab programming examples are emphasized for illustrating the use and development of digital filters in practice.
