Choral Conducting and the Construction of Meaning Jun 11 2021 It is a truism in teaching choral conducting that the director should look like s/he wishes the choir to sound. The conductor's physical demeanour has a direct effect on how the choir sings, at a level that is largely unconscious and involuntary. It is also a matter of simple observation that different choral traditions exhibit not only different styles of vocal production and delivery, but also different gestural vocabularies which are shared not only between conductors within that tradition, but also with the singers. It is as possible to distinguish a gospel choir from a barbershop chorus or a cathedral choir by visual cues alone as it is simply by listening. But how can these forms of physical communication be explained? Do they belong to a pre-cultural realm of primate social bonding, or do they rely on the context and conventions of a particular choral culture? Is body language an inherent part of musical performance styles, or does it come afterwards, in response to music? At a practical level, to what extent can a practitioner from one tradition mandate an approach as 'good practice', and to what extent can another refuse it on the grounds that 'we don't do it that way'? This book explores these questions at both theoretical and practical levels. It examines textual and ethnographic sources, and draws on theories from critical musicology and nonverbal communication studies to analyse them. By comparing a variety of choral traditions, it investigates the extent to which the connections between conductor demeanour and choral sound operate at a general level, and in what ways they are constructed within a specific idiom. Its findings will be of interest both to those engaged in the study of music as a cultural practice, and to practitioners involved in a choral conducting context that increasingly demands fluency in a variety of styles.

Barking to the Choir May 30 2020 In a moving example of unconditional love in difficult times, Gregory Boyle, the Jesuit priest and New York Times bestselling author of *Tattoos on the Heart*, shares what working with gang members in Los Angeles has taught him about faith, compassion, and the enduring power of kinship. In his first book, *Tattoos on the Heart: The Power of Boundless Compassion*, Gregory Boyle introduced us to Homeboy Industries, the largest gang-intervention program in the world. Critics hailed that book as an "astounding literary and spiritual feat" (*Publishers Weekly*) that is "destined to become a classic of both urban reportage and contemporary spirituality" (*Los Angeles Times*). Now, after the successful expansion of Homeboy Industries, Boyle returns with *Barking to the Choir* to reveal how compassion is transforming the lives of gang members. In a nation deeply divided and plagued by poverty and violence, *Barking to the Choir* offers a snapshot into the challenges and joys of life on the margins. Sergio, arrested at age nine, in a gang by age twelve, and serving time shortly thereafter, now works with the substance-abuse team at Homeboy to help others find sobriety. Jamal, abandoned by his family when he tried to attend school at age seven, gradually finds forgiveness for his schizophrenic mother. New father Cuco, who never knew his own dad, thinks of a daily adventure on which to take his four-year-old son. These former gang members uplift the soul and reveal how bright life can be when filled with unconditional love and kindness. This book is guaranteed to shake up our ideas about God and about people with a glimpse at a world defined by more compassion and fewer barriers. Gently and humorously, *Barking to the Choir* invites us to find kinship with one another and re-convince us all of our own goodness.

The Oxford Handbook of Choral Pedagogy Jul 24 2022 As the landscape of choral education changes - disrupted by Glee, YouTube, and increasingly cheap audio production software - teachers of choral conducting need current research in the field that charts scholarly paths through contemporary debates and sets an agenda for new critical thought and practice. Where, in the digitizing world, is the field of choral pedagogy moving? Editor Frank Abrahams and Paul D. Head, both experienced choral conductors and teachers, offer here a comprehensive handbook of newly-commissioned chapters that provide key scholarly-critical perspectives on teaching and learning in the field of choral music, written by academic scholars and researchers in tandem with active choral conductors. As chapters in this book demonstrate, choral pedagogy encompasses everything from conductors' gestures to the administrative management of the choir. The contributors to *The Oxford Handbook of Choral Pedagogy* address the full range of issues in contemporary choral pedagogy, from repertoire to voice science to the social and political aspects of choral singing. They also cover the construction of a choral singer's personal identity, the gendering of choral ensembles, social justice in choral education, and the role of the choral art in society more generally. Included scholarship focuses on both the United States and international perspectives in five sections that address traditional paradigms of the field and challenges to them; critical case studies on teaching and conducting specific populations (such as international, school, or barbershop choirs); the pedagogical functions of repertoire; teaching as a way to construct identity; and new scholarly methodologies in pedagogy and the voice.
