**Parking and the City** Jul 12 2021 Donald Shoup brilliantly overcame the challenge of writing about parking without being boring in his iconoclastic 800-page book *The High Cost of Free Parking*. Easy to read and often entertaining, the book showed that city parking policies subsidize cars, encourage sprawl, degrade urban design, prohibit walkability, damage the economy, raise housing costs, and penalize people who cannot afford or choose not to own a car. Using careful analysis and creative thinking, Shoup recommended three parking reforms: (1) remove off-street parking requirements, (2) charge the right prices for on-street parking, and (3) spend the meter revenue to improve public services on the metered streets. Parking and the City reports on the progress that cities have made in adopting these three reforms. The successful outcomes provide convincing evidence that Shoup's policy proposals are not theoretical and idealistic but instead are practical and realistic. The good news about our decades of bad planning for parking is that the damage we have done will be far cheaper to repair than to ignore. The 51 chapters by 46 authors in *Parking and the City* show how reforming our misguided and wrongheaded parking policies can do a world of good.

**Autonomous and Integrated Parking and Transportation Services** Sep 21 2019 In this book, the author outlines a Robust Web Parking, Truck and Transportation Portal (RWPTTP) for integrating parking and transportation services – a revolutionary approach in contrast to incremental change for managing traffic congestion. Autonomous vehicle technology, artificial intelligence, internet of things (IoT), and other interconnected hardware and software tools will assist autonomous parking and transportation services and provide next-century infrastructure for consolidated transportation customer services. The book highlights currently available autonomous parking and transportation technologies, and the development of an integrated and intelligent transportation service/system (IITS) platform, with specific use of technologies to reconfigure the transportation industry. The author also suggests many regulatory and policy changes to simplify data collection, traffic operation, introduction of a duplicate transportation system using light rail (LRs) and high speed rail (SPRs), and redistribution of parking spaces along such routes, using renewable energy.

**New Suburbanism: Sustainable Tall Building Development** Apr 28 2020 Much of the anticipated future growth in the United States will take place in suburbia. The critical challenge is how to accommodate this growth in a sustainable and resilient manner. This book explores the role of suburban tall as a viable, sustainable alternative to continued suburban sprawl. It identifies 10 spatial patterns in which tall buildings have been integrated into the American suburbs. The study concludes that the Tall Building and Transit-Oriented-Development (TB-TOD) model is the most appropriate to promote sustainable suburbanism. The findings are based on analyzing over 300 projects in 24 suburban communities within three major metropolitan areas including: Washington, DC, Miami, Florida, and Chicago, Illinois. The book furnishes planning strategies that address the social, economic, and environmental aspects of sustainable tall building development. It also discusses sustainable architectural design and site planning strategies and provides case studies of sustainable tall buildings that were successfully integrated into suburban settings.

**Politics of Parking** Sep 26 2022 There is more to parking law than just parking penalties. Considering the ways in which law works in everyday life, and in familiar places of common experience where the presence of law is not obvious, this book explores the various notions of the right to park, which jurisprudentially is enacted between individuals in everyday parking. From parking areas to the courtroom, parking engenders disputes over equality, speech, legitimacy, and entitlement that reach beyond the stated scope of policy. Looking beyond the obvious, this book examines the contested site of the parking space as a place of socio-legal meaning where property claims and rights shape identities. Adopting a constitutive approach to the study of law, the book examines how regulation of parking policy is at odds with the force of localised politics, producing competing notions of legality and examples of legal semiotics within the terrain of legal geography.

**Police Chief** Sep 02 2020 The author, Patrick Cote provides an in-depth analysis of police departments as seen through his 30 years of law enforcement experiences and trials and tribulations. **Practical Internet of Things Security** Mar 08 2021 A practical, indispensable security guide that will navigate you through the complex realm of securely building and deploying systems in our IoT-connected world About This Book Learn to design and implement cyber security strategies for your organization Learn to protect cyber-physical systems and utilize forensic data analysis to beat vulnerabilities in your IoT ecosystem Learn best practices to secure your data from device to the cloud Gain insight into privacy-enhancing techniques and technologies Who This Book Is For This book targets IT Security Professionals and Security Engineers (including pentesters, security architects and ethical hackers) who would like to ensure security of their organization's data when connected through the IoT. Business analysts and managers will also find it useful. What You Will Learn Learn how to break down cross-industry barriers by adopting the best practices for IoT deployments Build a rock-solid security program for IoT that is cost-effective and easy to maintain Demystify complex topics such as cryptography, privacy, and penetration testing to improve your security posture See how the selection of individual components can affect the security posture of the entire system Use Systems Security Engineering and Privacy-by-design principles to design a secure IoT ecosystem Get to know how to leverage the burgeoning cloud-based systems that will support the IoT into the future. In Detail With the advent of Internet of Things (IoT), businesses will be faced with defending against new types of threats. The business ecosystem now includes cloud computing infrastructure, mobile and fixed endpoints that open up new attack surfaces, a desire to share information with many stakeholders and a need to take action quickly based on large quantities of collected data. It therefore becomes critical to ensure that cyber security threats are contained to a minimum when implementing new IoT services and solutions. The interconnectivity of people, devices, and companies raises stakes to a new level as computing and action become even more mobile, everything becomes connected to the cloud, and infrastructure is strained to securely manage the billions of devices that will connect us all to the IoT. This book shows you how to implement cyber-security solutions, IoT design best practices and risk mitigation methodologies to address device and infrastructure threats to IoT solutions. This book will take readers on a journey that begins with understanding the IoT and how it can be applied in various industries, goes on to describe the security challenges associated with the IoT, and then provides a set of guidelines to architect and deploy a secure IoT in your Enterprise. The book will showcase how the IoT is implemented in early-adopting industries and describe how lessons can be learned and shared across diverse industries to support a secure IoT. Style and approach This book aims to educate readers on key areas in IoT security. It walks readers through engaging with security challenges and then provides answers on how to successfully manage IoT security and build a safe infrastructure for smart devices. After reading this book, you will understand the true potential of tools and solutions in order to build real-time security intelligence on IoT networks.

**Feral!** Jan 18 2022 How far would you go to protect your loved ones? When mild-mannered parking enforcement officer, Nigel Platt, meets his new neighbour, Callum Bowman, he smells trouble. After an altercation, during which Nigel is forced to issue a parking fine to Callum, he realises just how much trouble the head of the Bowman clan can be. Larger than life, Callum and

his sons deal drugs openly in front of their house, making life miserable for the local residents. When Nigel's wife asks him to call the police, they do nothing. After his wife and daughter are threatened by the Bowmans, Nigel decides to take matters into his own hands. And street vengeance is a recipe he knows only too well.

**House of Commons - Transport Committee: Local Authority Parking Enforcement - HC 118** Jun 23 2022 The use of parking charges and fines specifically to raise revenue by local authorities is neither acceptable nor legal. Annual parking accounts would allow the public to see how much local revenue is derived from the enforcement of fines, and what proportion of this comes from on or off street parking charges. It's right that parking charges be determined locally, but hard to justify fines that substantially exceed penalties for more serious offences like speeding. DfT's statutory guidance should stipulate that local authorities implement a 'grace period' of 5 minutes after the expiry of paid-for time on any paid parking before enforcement officers issue a Penalty Charge Notice (PCN). The Guidance should be clarified and updated, particularly in relation to rules for loading and unloading. A 25% penalty charge discount should also be introduced for motorists who pay within 7 days of losing any appeal to a parking tribunal. Local authorities currently offer a 50% discount if motorists pay their penalty charge within 14 days, but this is not available to motorists who appeal to a tribunal. Motorists should also not have to appeal against PCNs where tribunal adjudicators have repeatedly identified a problem such as poor signage. Adjudicators should also be given powers to allow appeals where local authorities fail to follow statutory guidance concerning the use of cameras. While businesses cannot be completely exempt from parking restrictions, local authorities must also ensure that the need to restrict parking and manage congestion does not stifle the ability of businesses to trade and help grow the economy

**Don't Get Mad at Penguins** Aug 01 2020 While most people view conflict as a bad thing that should be avoided at all costs, the reality is that embracing conflict in a healthy way is the single greatest factor in driving success and avoiding painful failure. *Don't Get Mad at Penguins* breaks down the factors that escalate conflict to dangerous heights and shows us how to defuse conflict and make it work for us rather than against us. Just as toxins in our bodies make us unhealthy, slow us down, and cause us pain, the same holds true for toxins in our organizations and minds. They cause healthy conflict to become destructive, which then consumes an organization's energy and taxes its ability to compete, grow, and prosper. Team engagements become pained, client relationships are strained, and individual careers suffer. The same unhealthy, painful dynamics play out in our personal lives as well. The key to making conflict work for our benefit lies in removing toxins from our interactions, and *Don't Get Mad at Penguins* offers simple yet powerfully effective tools to do just that.

**Parking Policy and Enforcement** Nov 16 2021 This publication contains a range of oral and written evidence taken by the Committee in relation to its inquiry into parking enforcement policy in Britain (HCP 748-I, session 2005-06; ISBN 0215029305), including evidence from officials representing the Department for Transport, Transport for London, the Local Government Association and various local authorities, the National Parking Adjudicator Service and the Chief Parking Adjudicator for London, the British Parking Association and the Freight Transport Association.

**The Big Book of Car Culture** Oct 03 2020 With the powerful, rhythmic sounds of Aboriginal English and Kokatha language woven through the narrative, *Mazin Grace* is the inspirational story of a feisty girl who refuses to be told who she is, determined to uncover the truth for herself. Growing up on the Mission isn't easy for clever Grace Oldman. When her classmates tease her for not having a father, she doesn't know what to say. Pappa Neddy says her dad is the Lord God in Heaven, but that doesn't help when the Mission kids call her a bastard. As Grace slowly pieces together clues that might lead to answers, she struggles to find a place in a community that rejects her for reasons she doesn't understand. In this novel, author Dylan Coleman fictionalizes her mother's childhood at the Koonibba Lutheran Mission in South Australia in the 1940s and 1950s.

**Fundamentals of Internet of Things for Non-Engineers** May 30 2020 The IoT is the next manifestation of the Internet. The trend started by connecting computers to computers, progressed to connecting people to people, and is now moving to connect everything to everything. The movement started like a race—with a lot of fanfare, excitement, and cheering. We're now into the work phase, and we have to figure out how to make the dream come true. The IoT will have many faces and involve many fields as it progresses. It will involve technology, design, security, legal policy, business, artificial intelligence, design, Big Data, and forensics; about any field that exists now. This is the reason for this book. There are books in each one of these fields, but the focus was always "an inch wide and a mile deep." There's a need for a book that will introduce the IoT to non-engineers and allow them to dream of the possibilities and explore the work venues in this area. The book had to be "a mile wide and a few inches deep." The editors met this goal by engaging experts from a number of fields and asking them to come together to create an introductory IoT book. *Fundamentals of Internet of Things for Non-Engineers* Provides a comprehensive view of the current fundamentals and the anticipated future trends in the realm of Internet of Things from a practitioner's point of view Brings together a variety of voices with subject matter expertise in these diverse topical areas to provide leaders, students, and lay persons with a fresh worldview of the Internet of Things and the background to succeed in related technology decision-making Enhances the reader's experience through a review of actual applications of Internet of Things end points and devices to solve business and civic problems along with notes on lessons learned Prepares readers to embrace the Internet of Things era and address complex business, social, operational, educational, and personal systems integration questions and opportunities

**University Sheepdog in Westwood, L.A.** Dec 17 2021 Retired UCLA Police Officer, Terrence Duren, at the center of the 2006 UCLA Taser Incident, writes his memoir, "University Sheepdog in Westwood, Los Angeles" to set the record straight regarding his life and law enforcement career. There were television news reports and articles written about the Taser incident and of Terrence Duren's past. Some of these news reports and articles were unflattering and did not paint a complete picture of him and other officers involved in the Taser incident. In addition to the protests held at UCLA and other UC campuses, there were high volume of telephone calls to UCLA with people voicing their anger and support over the Taser incident. These telephone calls came from people living in the United States and abroad. There was such a high volume of phone calls that UCLA's telecommunications nearly broke down. After a complete and thorough investigation, the UCLA police chief as well as UCLA campus administrators, concluded that Officer Duren did not violate policy with his use of the Taser. "University sheepdog in Westwood, Los Angeles" is a memoir that gives a better understanding of Officer Terrence Duren and his former colleagues. This memoir is a story of "Sheepdogs" (police officers), protecting the "Sheep" (students/faculty/staff/visitors and others), from the "Wolves" (criminals). Some of the contents in this memoir will tell of Terrence Duren's Officer Involved Shootings, on and off campus, his working undercover for six months buying narcotics from UCLA hospital employees, his confrontation with members of the Nation of Islam, his SWAT standoff with an armed suspect, lewd and lascivious activity in the men's restrooms, his mentoring victims and suspects, flammifer, and more! Additionally, this Memoir has contents regarding Terrence's childhood growing up around Black Panthers, his service in the United States Marine Corps in peace time and during the First Gulf War. This memoir is unlike any other police story ever told. As you read this memoir, sit down and strap up because you are about to go on a ride!
