Inventing Futurism Aug 14 2021 In 1909 the poet Filippo Tommaso Marinetti published the founding manifesto of Italian Futurism, an inflammatory celebration of "the love of danger" and "the beauty of speed" that provoked readers to take aggressive action and "glorify war--the world's only hygiene." Marinetti's words unleashed an influential artistic and political movement that has since been neglected owing to its exaltation of violence and nationalism, its overt manipulation of mass media channels, and its associations with Fascism. Inventing Futurism is a major reassessment of Futurism that reintegrates it into the history of twentieth-century avant-garde artistic movements. Countering the standard view of Futurism as naïvely bellicose, Christine Poggi argues that Futurist artists and writers were far more ambivalent in their responses to the shocks of industrial modernity than Marinetti's incendiary pronouncements would suggest. She closely examines Futurist literature, art, and politics within the broader context of Italian social history, revealing a surprisingly powerful undercurrent of anxiety among the Futurists--toward the accelerated rhythms of urban life, the rising influence of the masses, changing gender roles, and the destructiveness of war. Poggi traces the movement from its explosive beginnings through its transformations under Fascism to offer completely new insights into familiar Futurist themes, such as the thrill and trauma of velocity, the psychology of urban crowds, and the fantasy of flesh fused with metal, among others. Lavishly illustrated and unparalleled in scope, *Inventing Futurism* demonstrates that beneath Futurism's belligerent avant-garde posturing lay complex and contradictory attitudes toward an always-deferred utopian future.

Article Marketing Secrets Exposed Oct 28 2022 Of all the ways to make money online, in my opinion, article marketing is the easiest and best way for anybody to make their first dollar. The best part is that without spending any more than the cost of a domain name, you can create a passive income that can bring you money from an article that you wrote years ago. So ask yourself: "Is spending a few minutes writing a 250-word article worth the time if it brings you money still years later?" I thought yes would be the answer. I'm sure you've heard a ton of different opinions on how you should do article marketing and how you should provide the best information possible, write informative articles and give your reader value and so on. Well, what you're about to read is probably going to go against a lot of what you have read, and the article "gurus" are not going to like it....but doing it this way has made me A LOT of money so I don't care if they agree with me or not! I'm going to do it the way it makes money and a way that continues to bring me money day in and day out. If you are willing to put in the time to follow this method, you WILL make money and a good amount of it. What you need to remember is that there is no super highway to making money on the Internet. You MUST stay consistent and motivated even when you get frustrated and feel like things are not going your way. It is those who continue to work and promote their business that will in the end be successful. So, no more pep talks. Let's get right into it.

Discovering Rome's Eastern Frontier Dec 18 2021 The eastern frontier of the Roman Empire extended from northern Syria to the western Caucasus, across a remote and desolate region 800 miles from the Aegean. It followed the great Euphrates valley to penetrate the harsh mountains of Armenia Minor and south of the Black Sea, along the Pontic coast to the finally reach the foothills of the Caucasus. Though vast, this terrain has long remained one of the great gaps in our knowledge of the ancient world, barely visited and effectively unknown — until now. Here, Timothy Bruce Mitford offers an account of half a century of research and exploration over sensitive territory, in challenging conditions, to discover the material remains of Rome's last unexplored frontier. The

geographical framework introduces frontier installations as they occur: fortresses and forts, roads, bridges, signalling stations, and navigation of the Euphrates. The journey is enriched with observations of consuls and travellers, memories of Turkish and Kurdish villagers, and notes and photographs of a way of life little changed since antiquity. The process of discovery was mainly on foot; staying in villages with local guides, following ancient tracks, and conversing with great numbers of people - provincial and district governors, village elders and teachers, police and jandarma, farmers and shepherds, and everyone in between. This came with its perils and pleasures; encounters with treasure hunters and apparent bandits, tales of saints and caravans, arrests and death threats, bears and wild boars, rafts and fishing, earthquakes, all amid the tumultuous events of the second half of the twentieth century. Richly illustrated with large-scale maps, photographs, and sketches, this is an account of travel and discovery, set against a background of a disappearing world encountered in the long process of academic exploration.
