- Customary International Humanitarian Law Nov 23 2019 In 1995, the International Committee of the Red Cross, along with a range of renowned experts, embarked upon a major international study into current state practice in humanitarian law in order to identify customary law in this area. This book (and its companion, Volume 1: Rules) is the result of that study. Volume 2 contains a summary of the relevant treaty law, international case-law and relevant state practice including legislation, military manuals, case-law, official statements, and official military practice for each aspect of humanitarian law. Also available: Volume 1: Rules

- Management of Common Musculoskeletal Disorders Sep 14 2021 The fundamental textbook of orthopedic physical therapy is now in its thoroughly updated Fourth Edition. This new edition presents a "how-to" approach focusing on the foundations of manual therapy. More than 1,200 illustrations and photographs demonstrate therapeutic techniques. Extensive references cite key articles, emphasizing the latest research. Reflecting current practice standards, this edition places greater emphasis on joint stabilization techniques and the role of exercise. Coverage includes new material on soft tissue manipulations and myofascial evaluation. This edition also features case studies covering real-life practice scenarios.
- Handbook of Manufacturing Engineering, Second Edition - 4 Volume Set Mar 20

2022 Provides single-source coverage on the full range of activities that meet the manufacturing engineering process, including management, product and process design, tooling, equipment selection, facility planning and layout, plant construction, materials handling and storage, method analysis, time standards, and production control. The text examines every topic involved with product and factory development, parts fabrication, and assembly processes.
