[Textbook of Clinical Medicine for Asia](#) Jul 19 2021

Most textbooks of clinical medicine are written by authors in Western countries. Asia has 60% of the world's population and the disease pattern in this region is, in many aspects, quite different from that of the West. "Textbook of Clinical Medicine for Asia" is written by a group of local experts in Hong Kong. While it is based on Western medicine, this book places particular emphasis on diseases prevalent in Asia, e.g., IgA nephropathy, recurrent pyogenic cholangitis,

thyrotoxic period paralysis and many other infections. The use of herbal drugs and their possible toxic effects are also included. Designed primarily for use by medical students and trainees in internal medicine, the book should also be an interesting reference for physicians who practice in Asia as well as physicians in the West who occasionally see Asian patients.

**True to Type** Jan 25 2022 The MyersBriggs Type Indicator. Every year, millions of people take it. Carefully validated, highly reliable, the MBTI has become the most popular personality indicator in the world, an indispensable tool for managers, consultants, trainers and personal administrators. The MBTI is an indicator, not a test. It is not meant to predict performance, analyze abilities, categorize, or make value judgments. It is designed to show and individual's preferences in four areas of life: how we see reality; how we judge that reality; where we go to get our energy for life; and how others see our

orientation to the world. Unfortunately, all too often, those taking the MBTI sometimes even those administering or interpreting it misunderstand what it measures and what conclusions can be drawn from the results. That's where True to Type comes in. Written in a simple and straightforward manner by an experienced consultant, True to Type helps the reader understand and interpret the MBTI. This is a book for those who have taken it and want to know what it means to them.

**The Most Common Mistakes in English Usage** Oct 02 2022

This book analyzes the errors most commonly made in spoken and written English and presents them in a systematic, down-to-earth manner. It does not dictate grammar to the reader; rather, it presents the guidelines for English usage currently being observed by the most competent and careful speakers and writers. The most troublesome words and phrases—as well as grammatical terms—are listed alphabetically within 18 subject areas to enable the reader to check quickly on questions of usage. In each case, illustrative examples are given, and the guiding principle is stated for the reader to follow in avoiding the mistake and others similar to it. An extensive index for additional ease of reference helps make this book a handy tool for the modern reader who realizes that mere knowledge

advanced and revolutionary method that was ever designed for quickly becoming conversational in the twenty-seven most common languages. In creating this time-saving program, master linguist Yatir Nitzany spent years examining those twenty-seven most common languages in the world and distilling from them the three hundred and fifty words that are most likely to be used in real conversations. These three hundred and fifty words were chosen in such a way that they were structurally interrelated and, when combined, form sentences. Through various other discoveries about how real conversations work--discoveries that are detailed further in this book--Nitzany created the necessary tools for linking these words together in a specific way so that you may become rapidly and almost effortlessly conversant--now. If you want to learn complicated grammar rules, or the non-Romanized alphabet of a foreign language, this book is not for you. However, if you

need to actually hold a conversation while on a trip to a foreign country, to impress that certain someone, or to be able to speak with your grandfather or grandmother as soon as possible, then the Nitzany Method is what you have been looking for. This method is designed for fluency in a foreign language, while communicating in the first person present tense. Nitzany believes that what's most important is actually being able to understand and be understood by another human being right away. Therefore, unlike other courses, all words in this program are taught in English transliteration, without having to learn the complex alphabet. More formalized training in grammar rules, etc., can come later. This is one of the several, in a series of instructional language guides, the Nitzany Method's revolutionary approach is the only one in the world that uses its unique language technology to actually enable you to speak and understand native speakers in the shortest
